Practical 02: Dive into AWS

OUR VISION: TO BE A WORLD CLASS UNIVERS

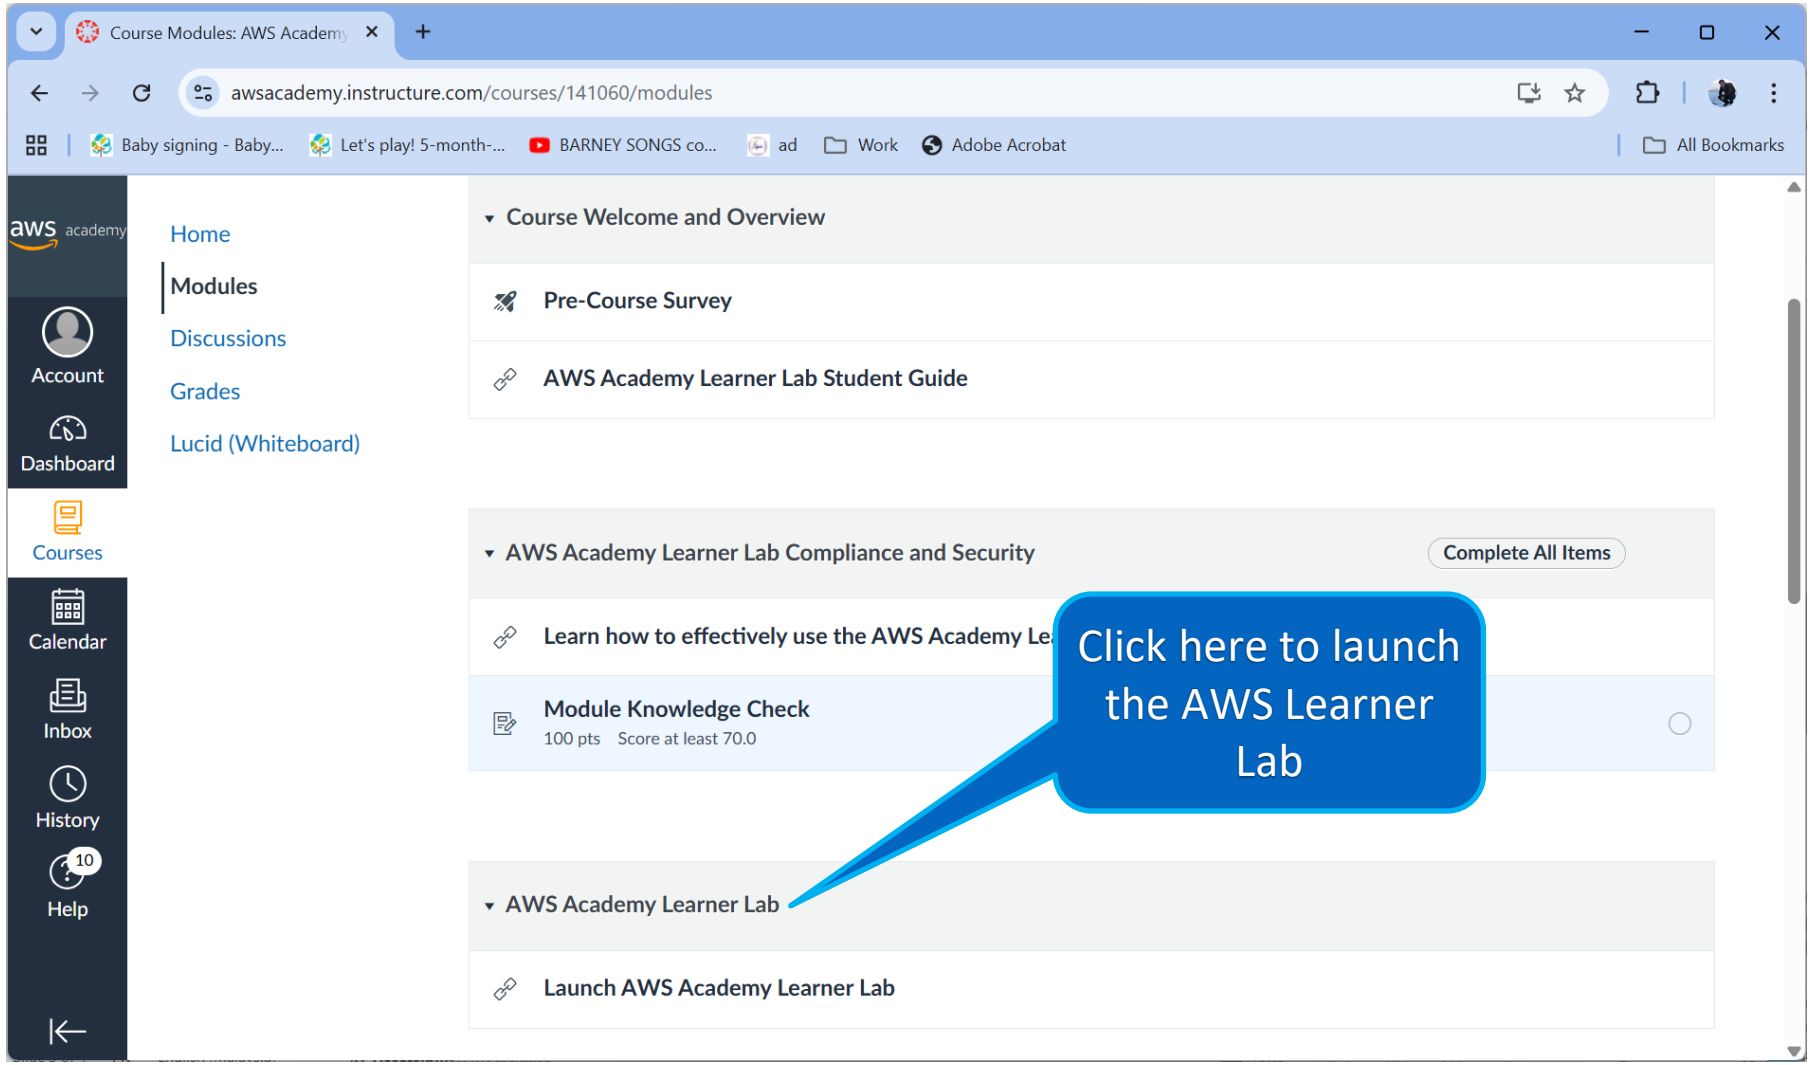

NET3204
Distributed Systems

Chee Sun LIEW cheesunl@sunway.edu.my

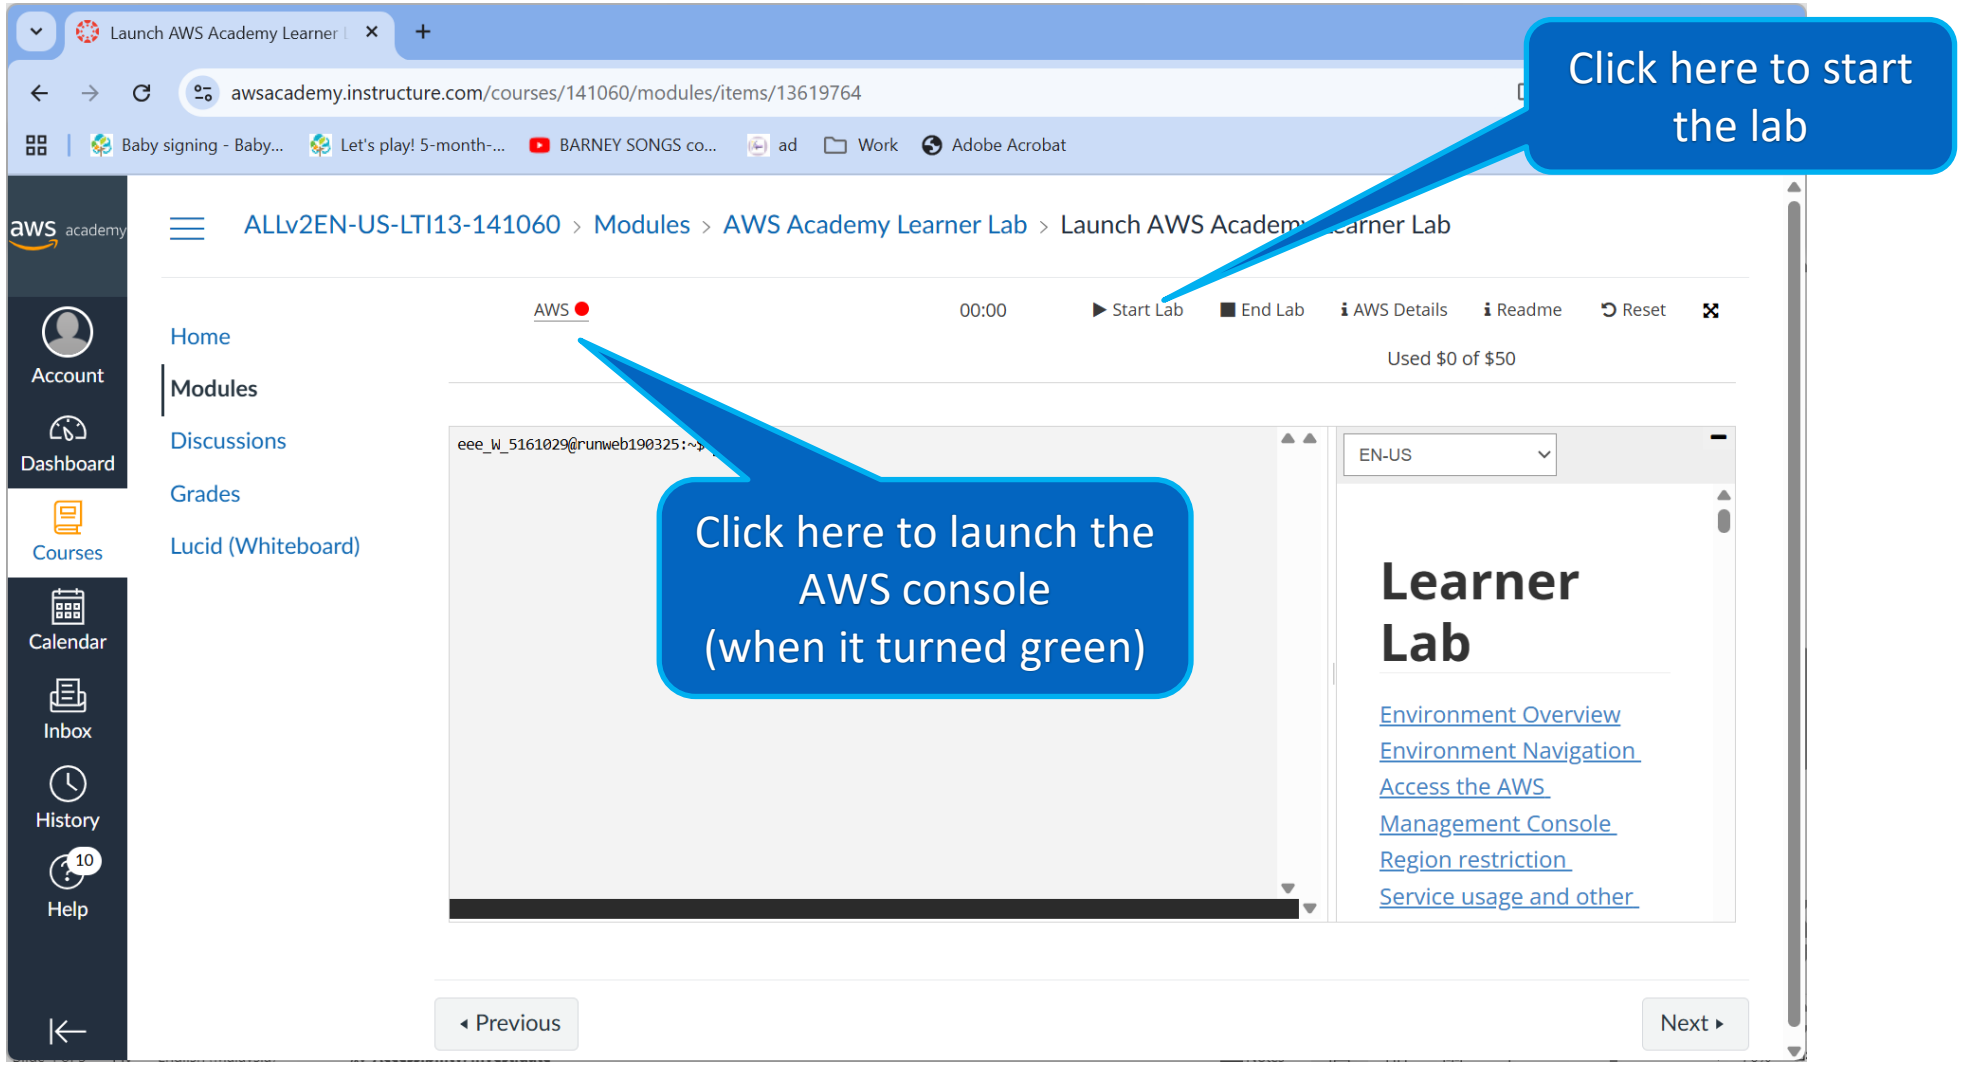

Practical Description

- In this practical, you will learn how to:
  - Sign in to the AWS Academy
  - Launch a virtual machine from the AWS EC2
  - Set up a Apache2 Web Server
  - Edit and display the default web page

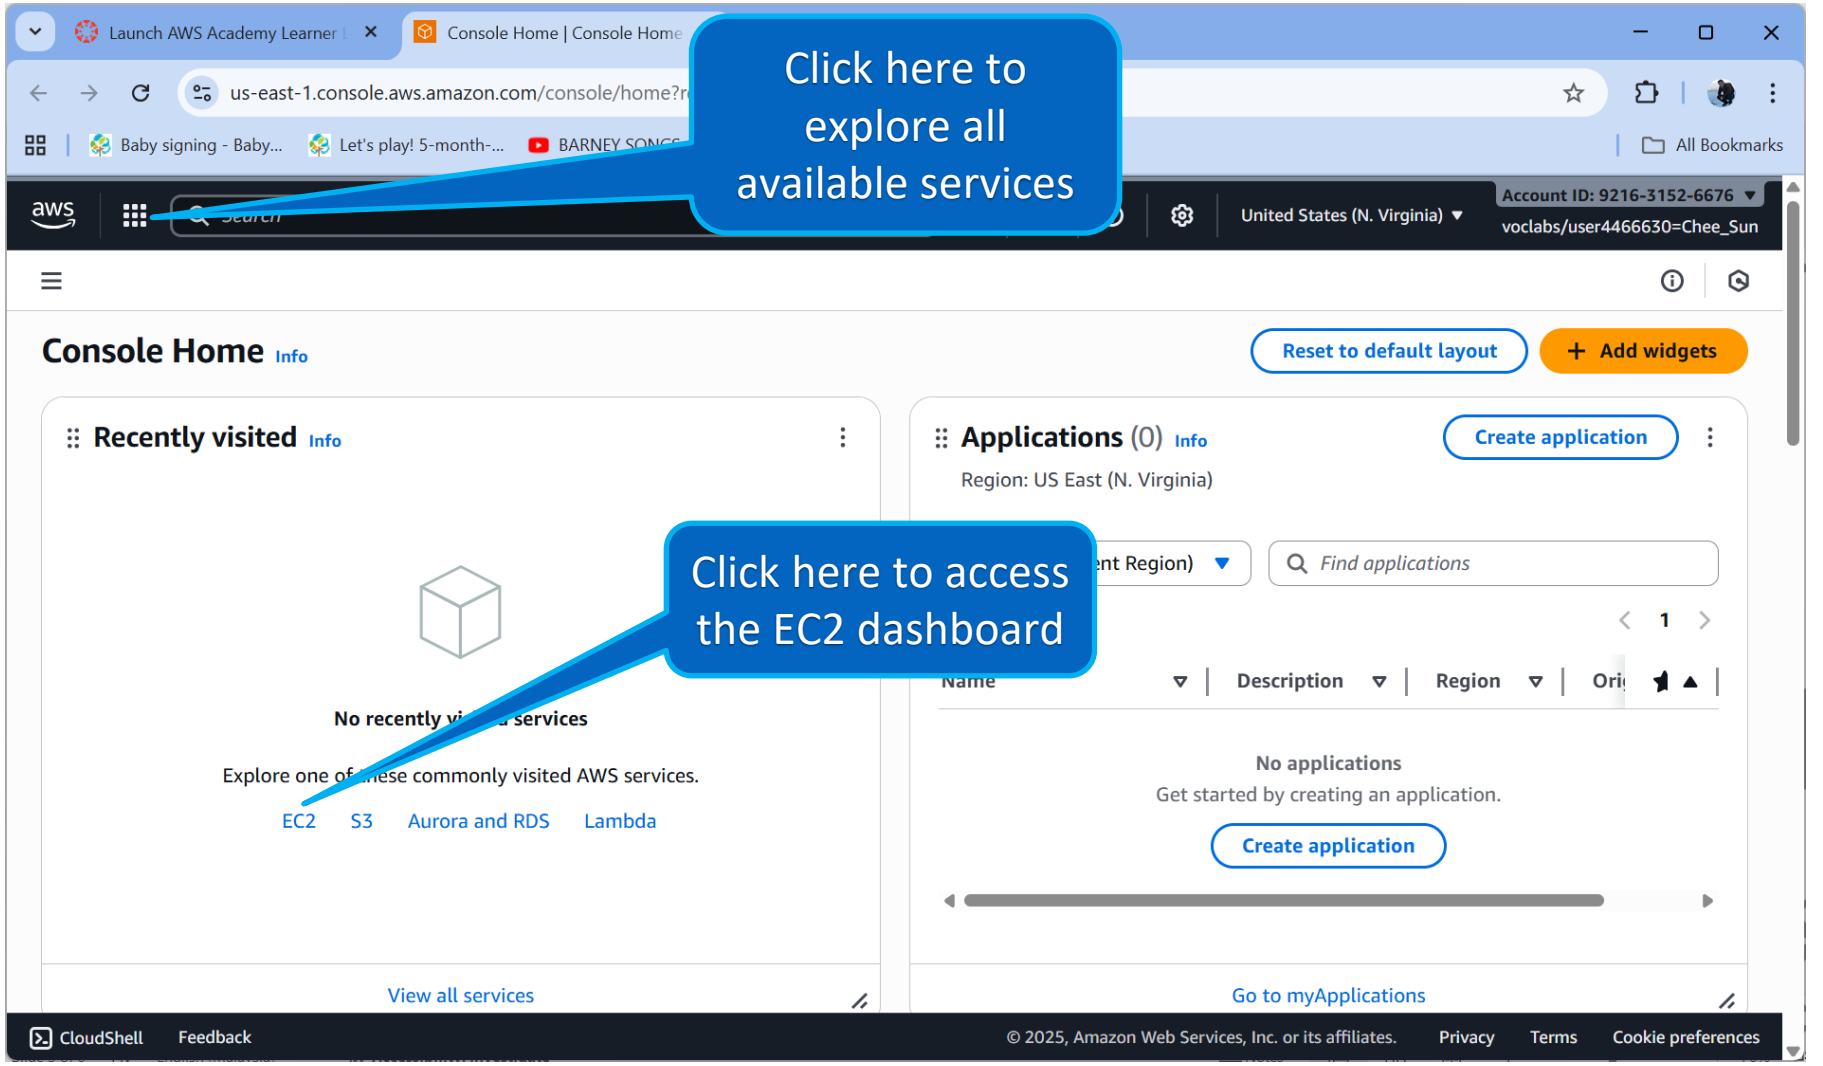

1. Sign in to the Course Page

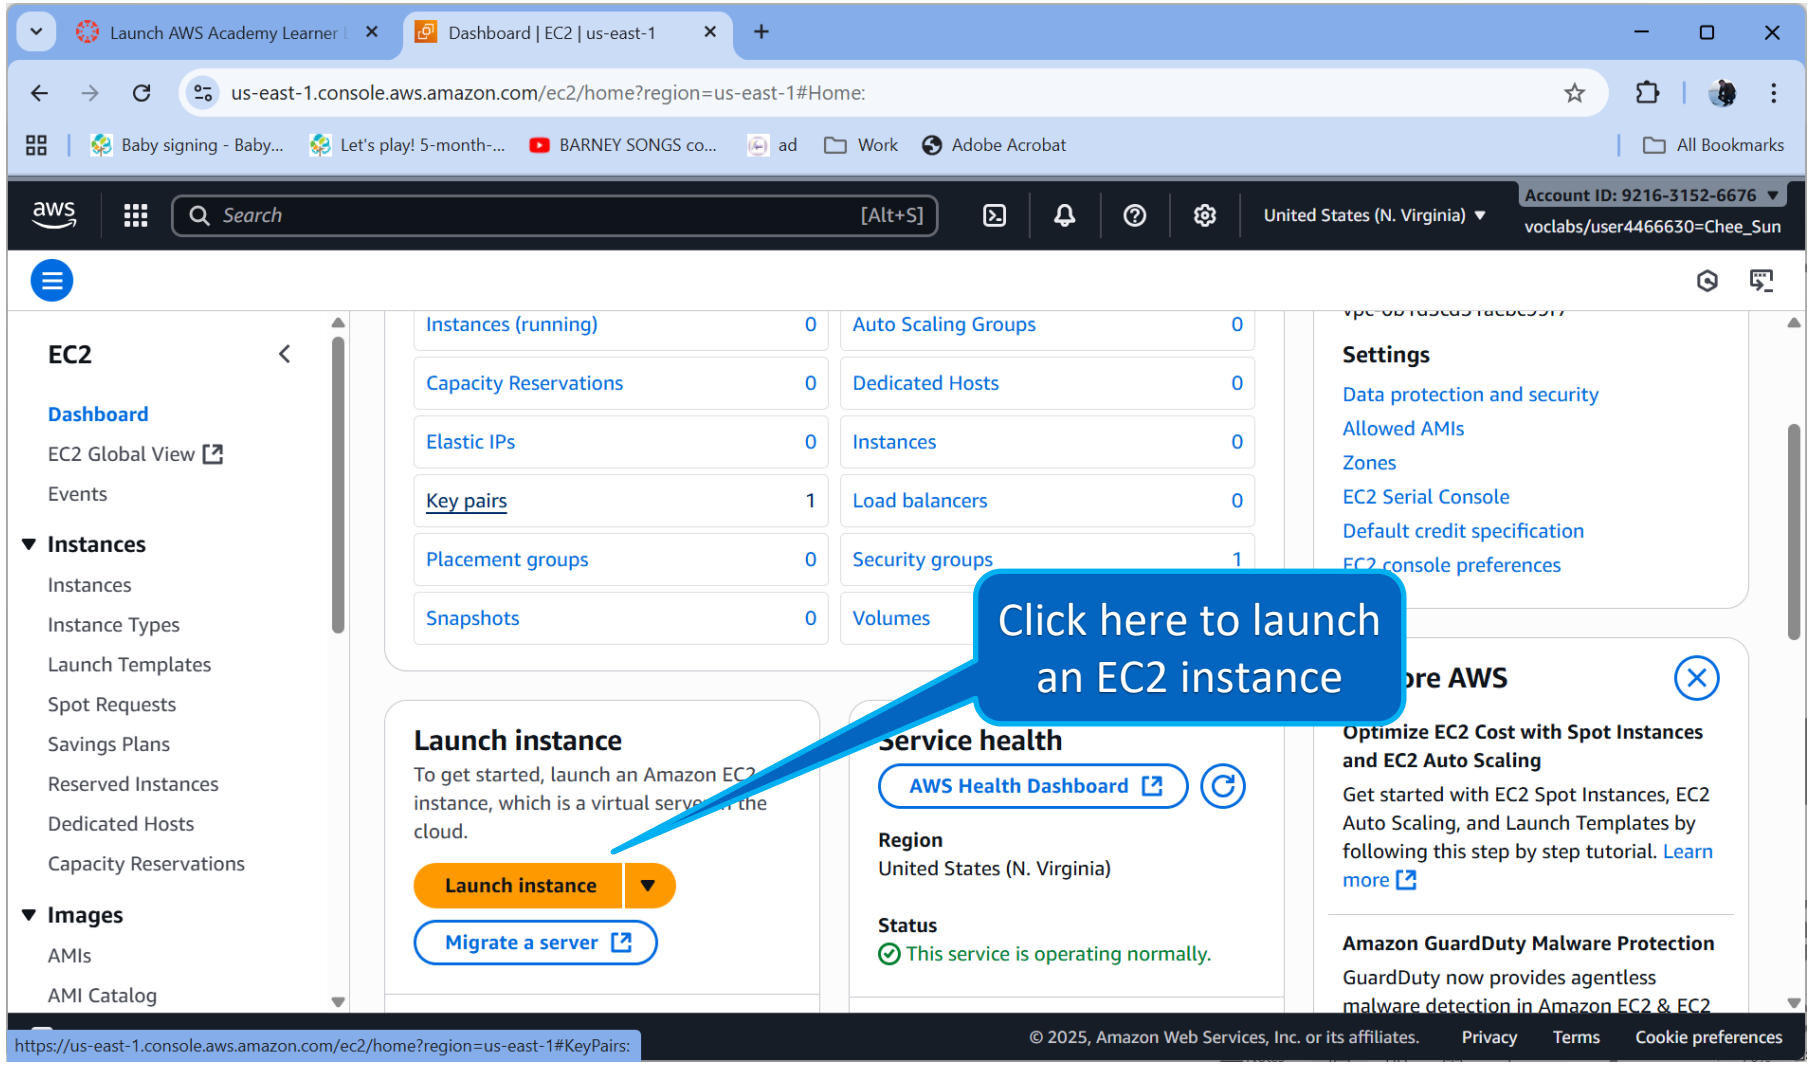

2. Launch the lab console in AWS

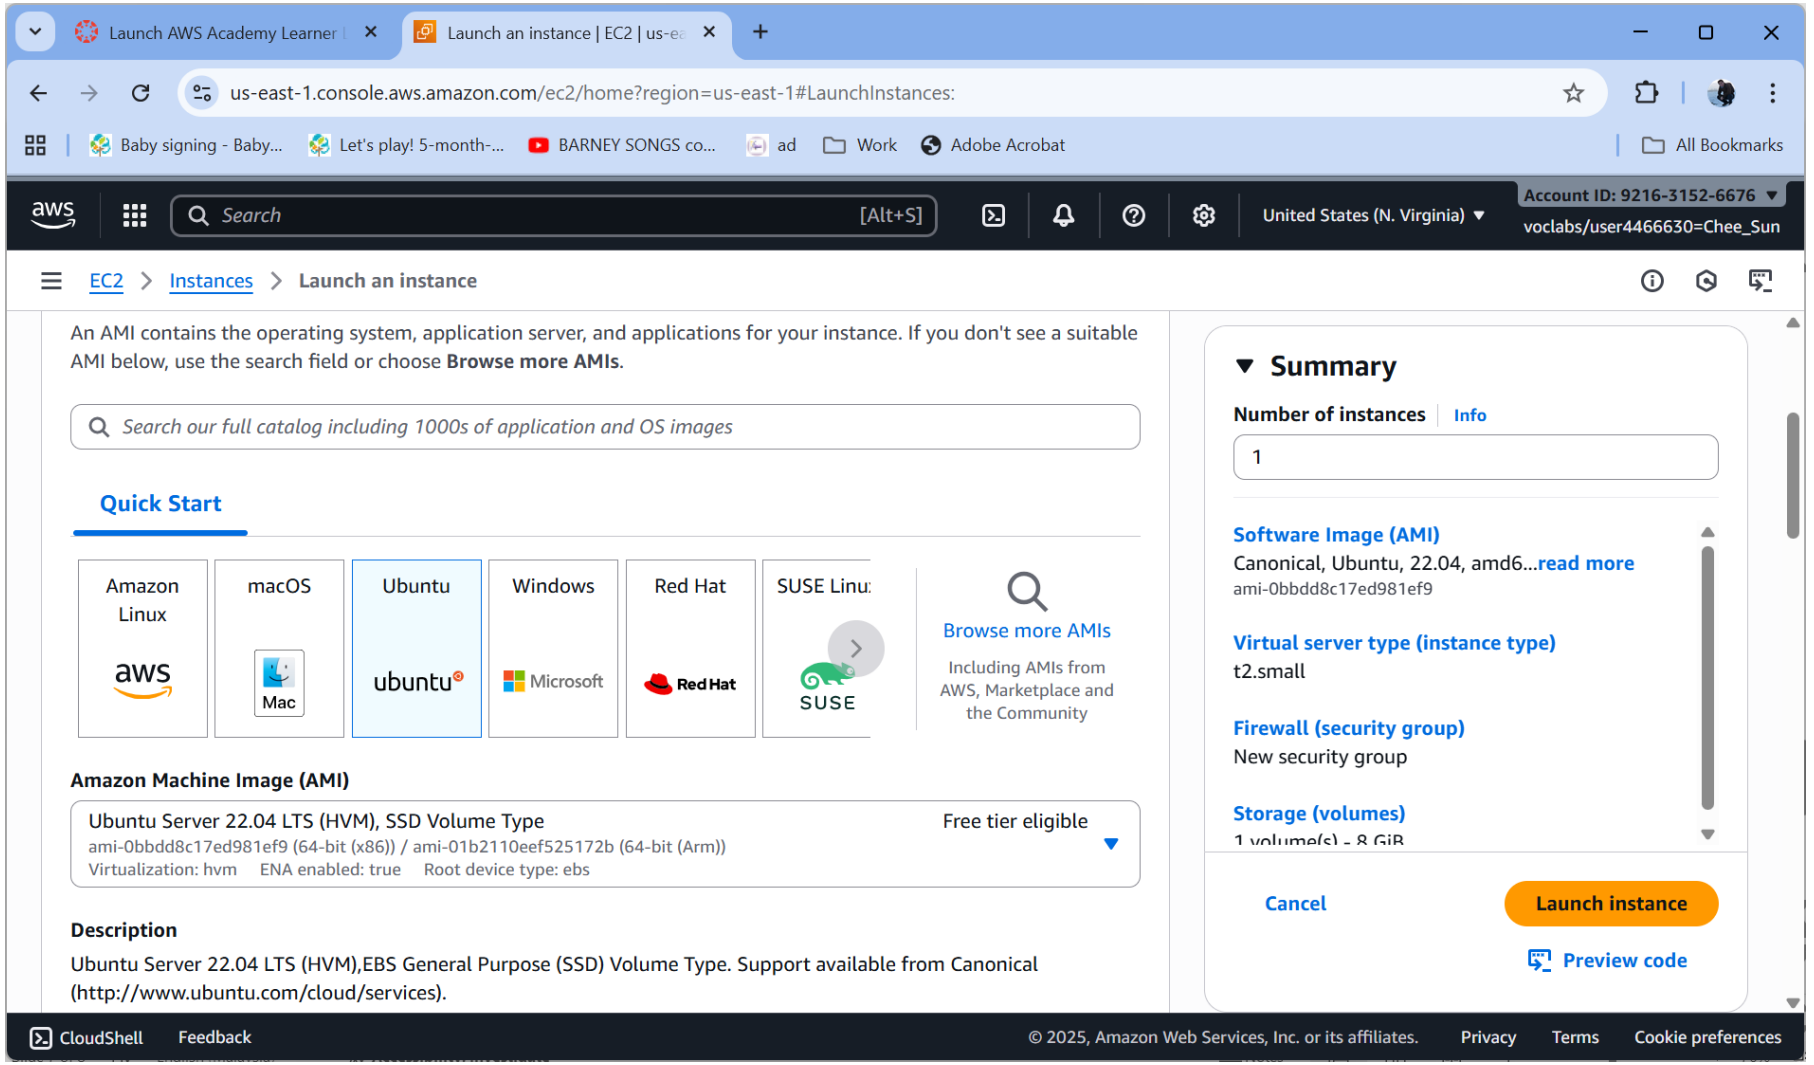

3. AWS Console landing page

4. Launch an EC2 instance

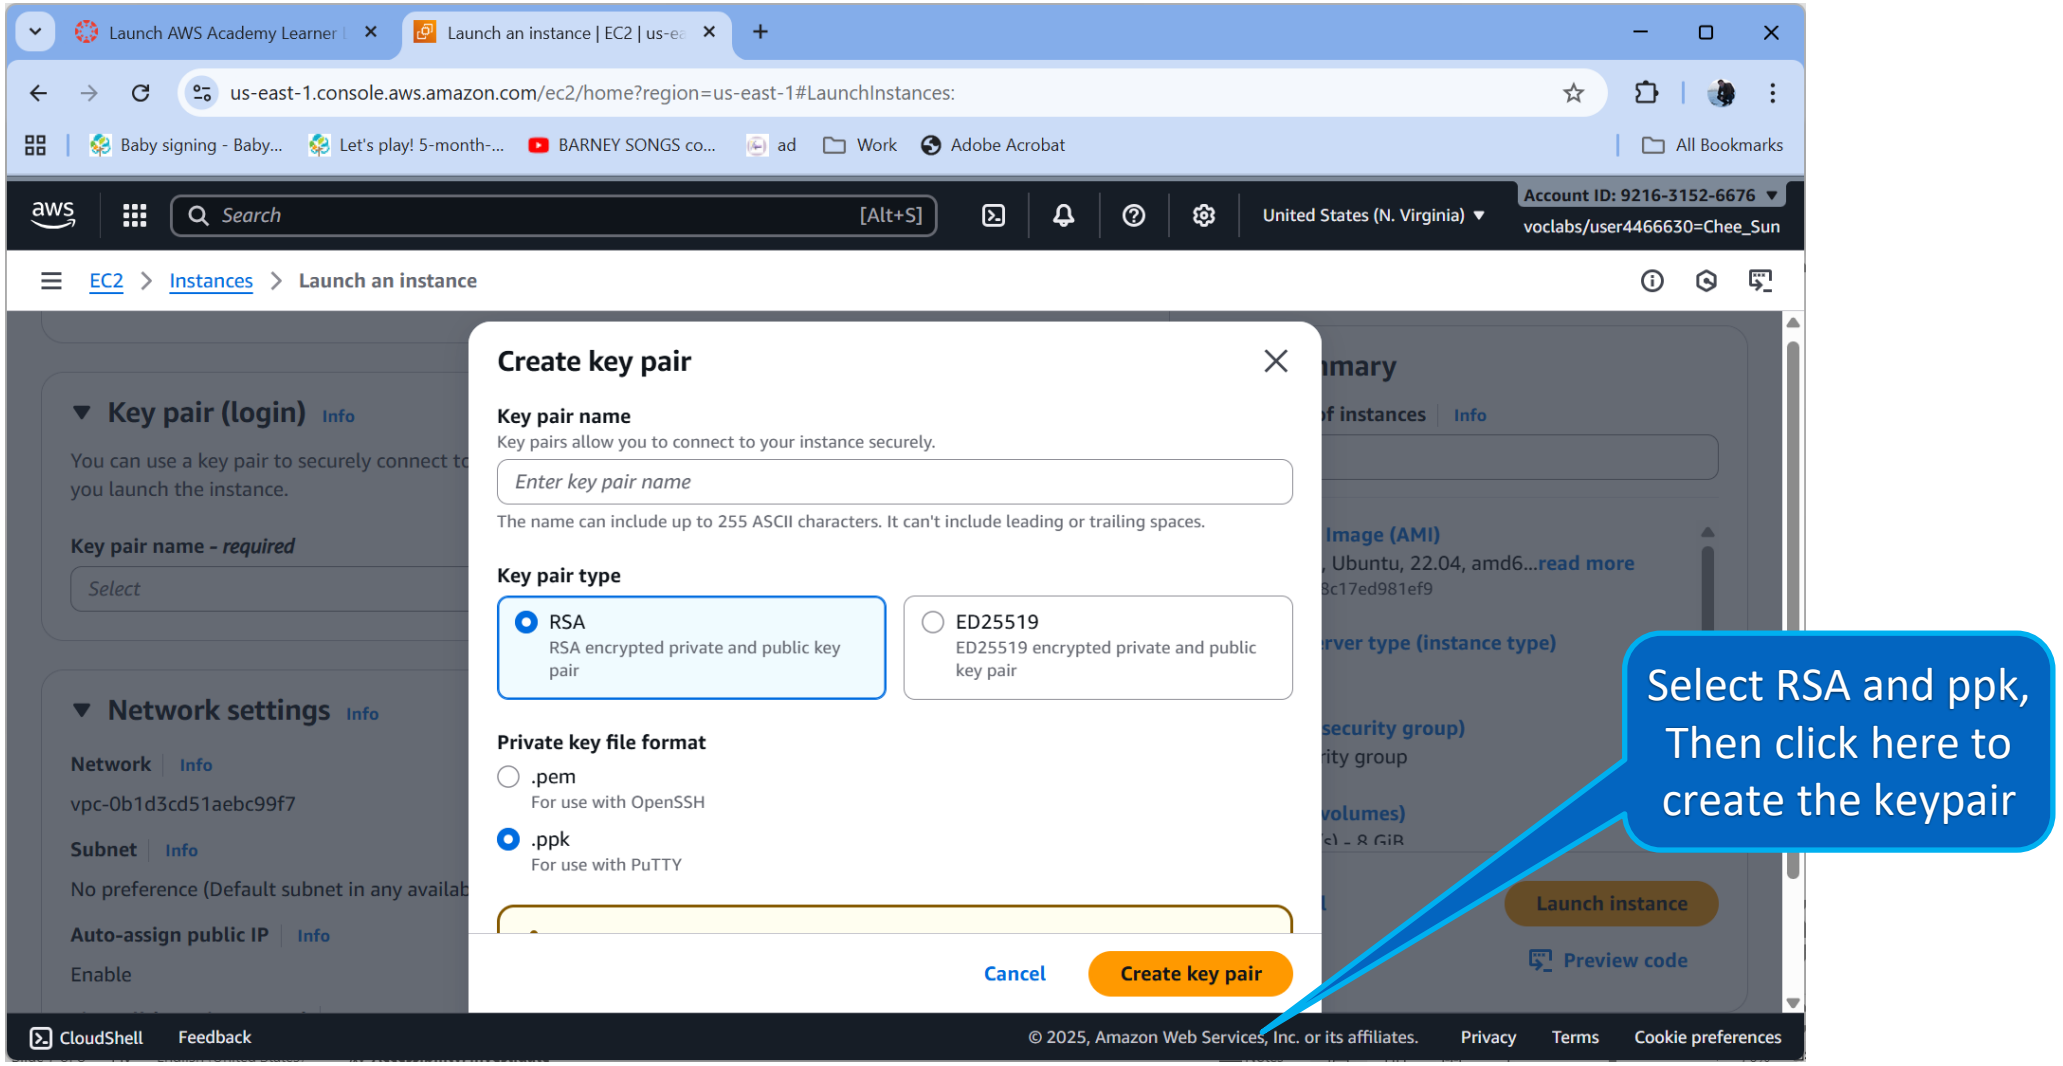

5. Configure the instance

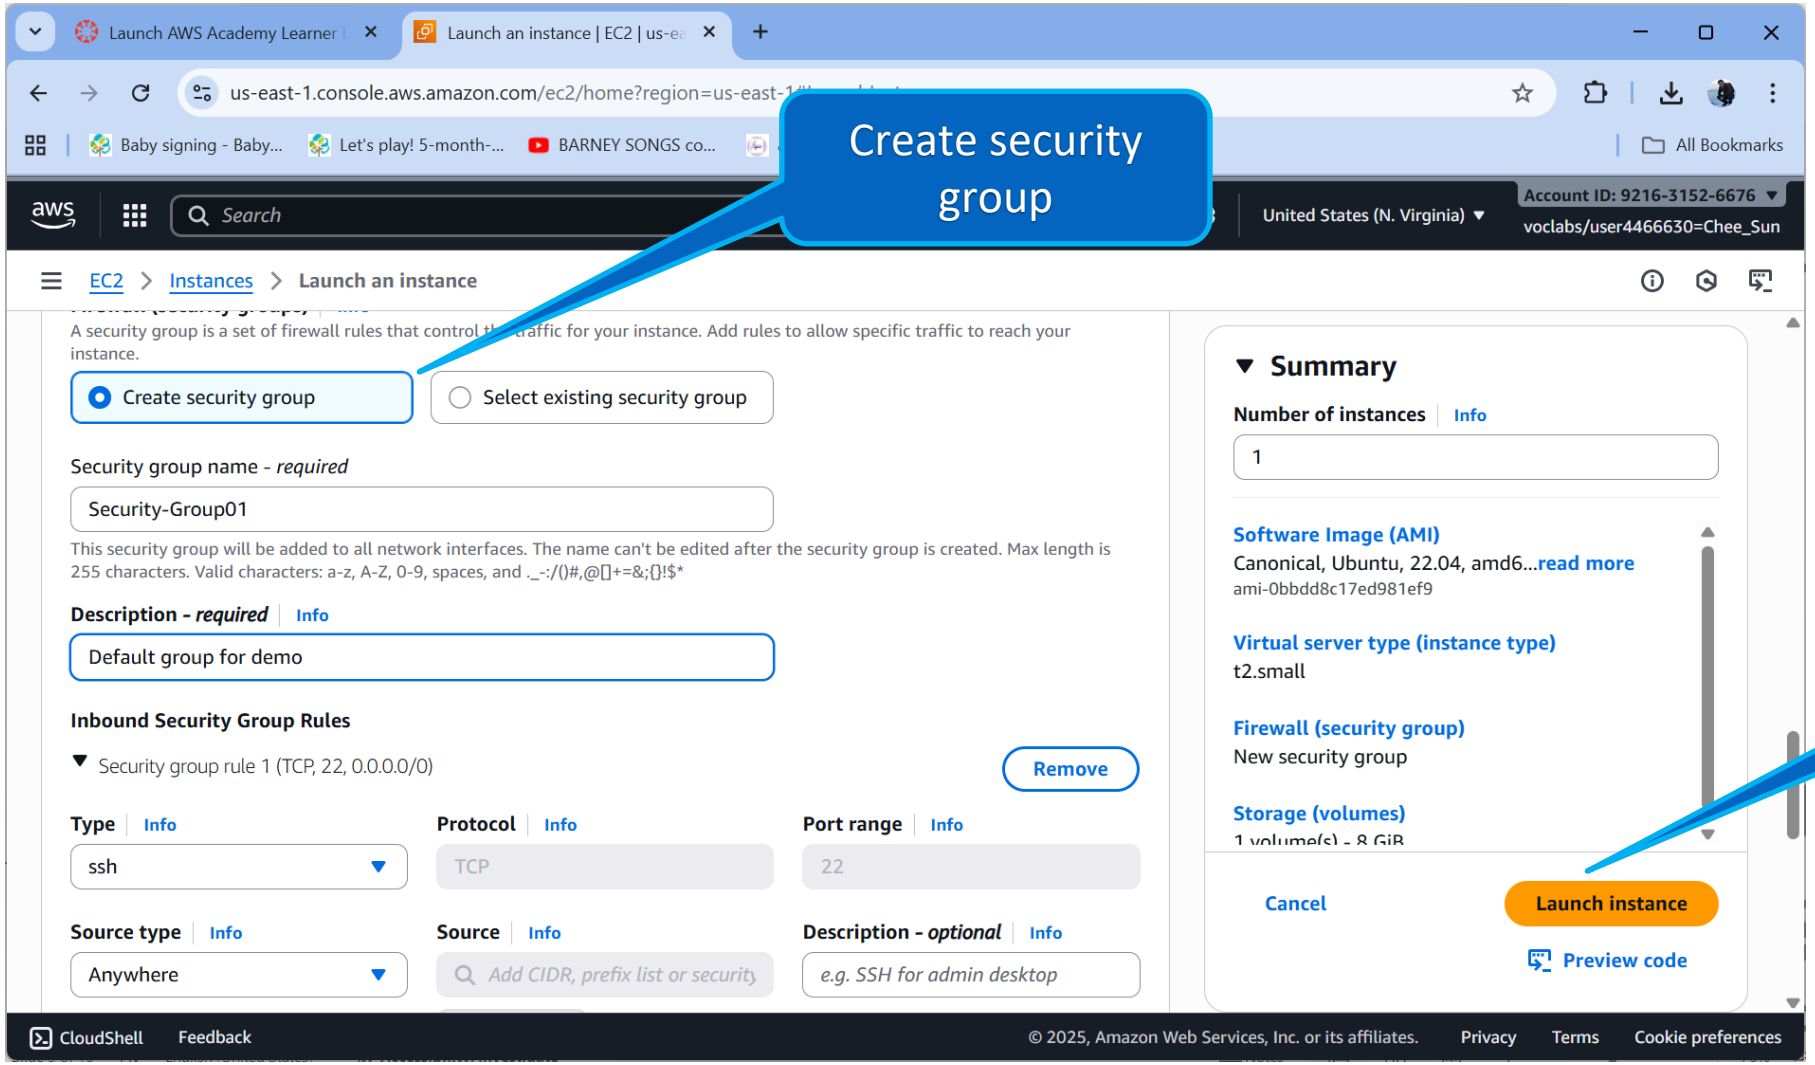

- Ubuntu 22.04
- T2.small

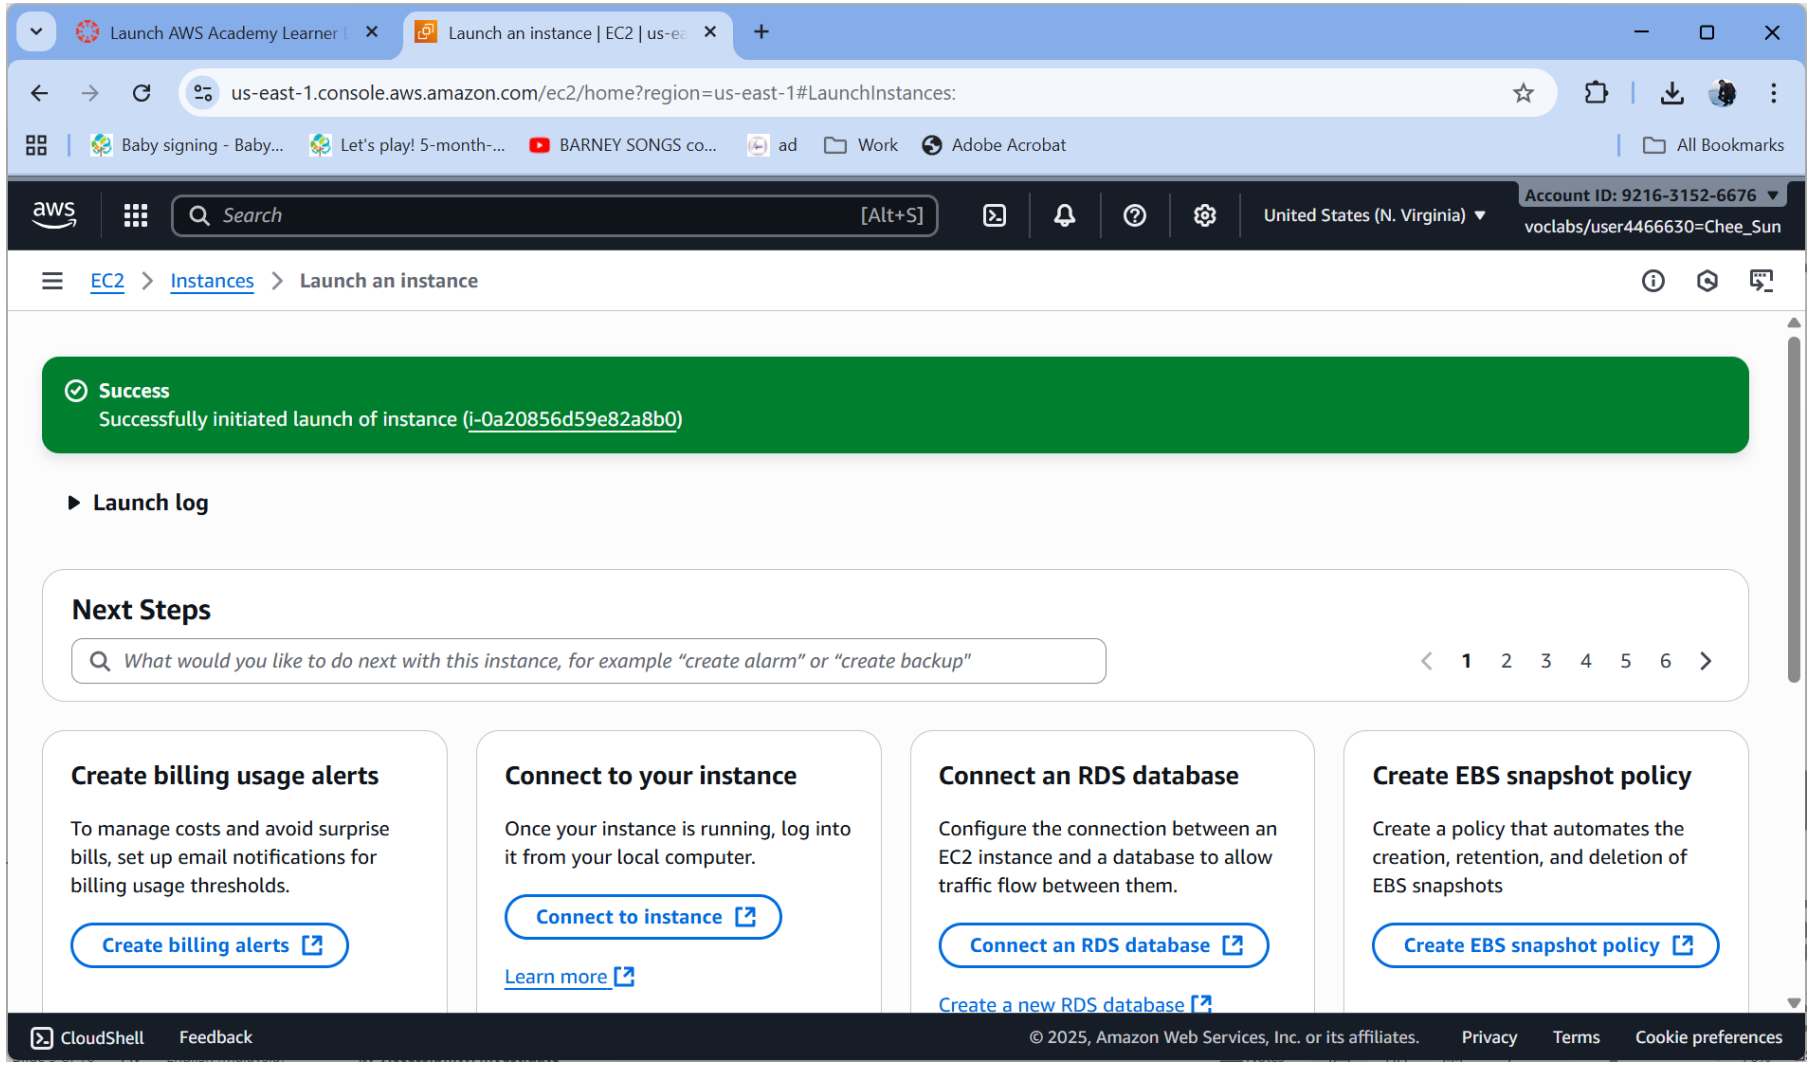

5.1 Generate a key-pair

5.2 Create security group

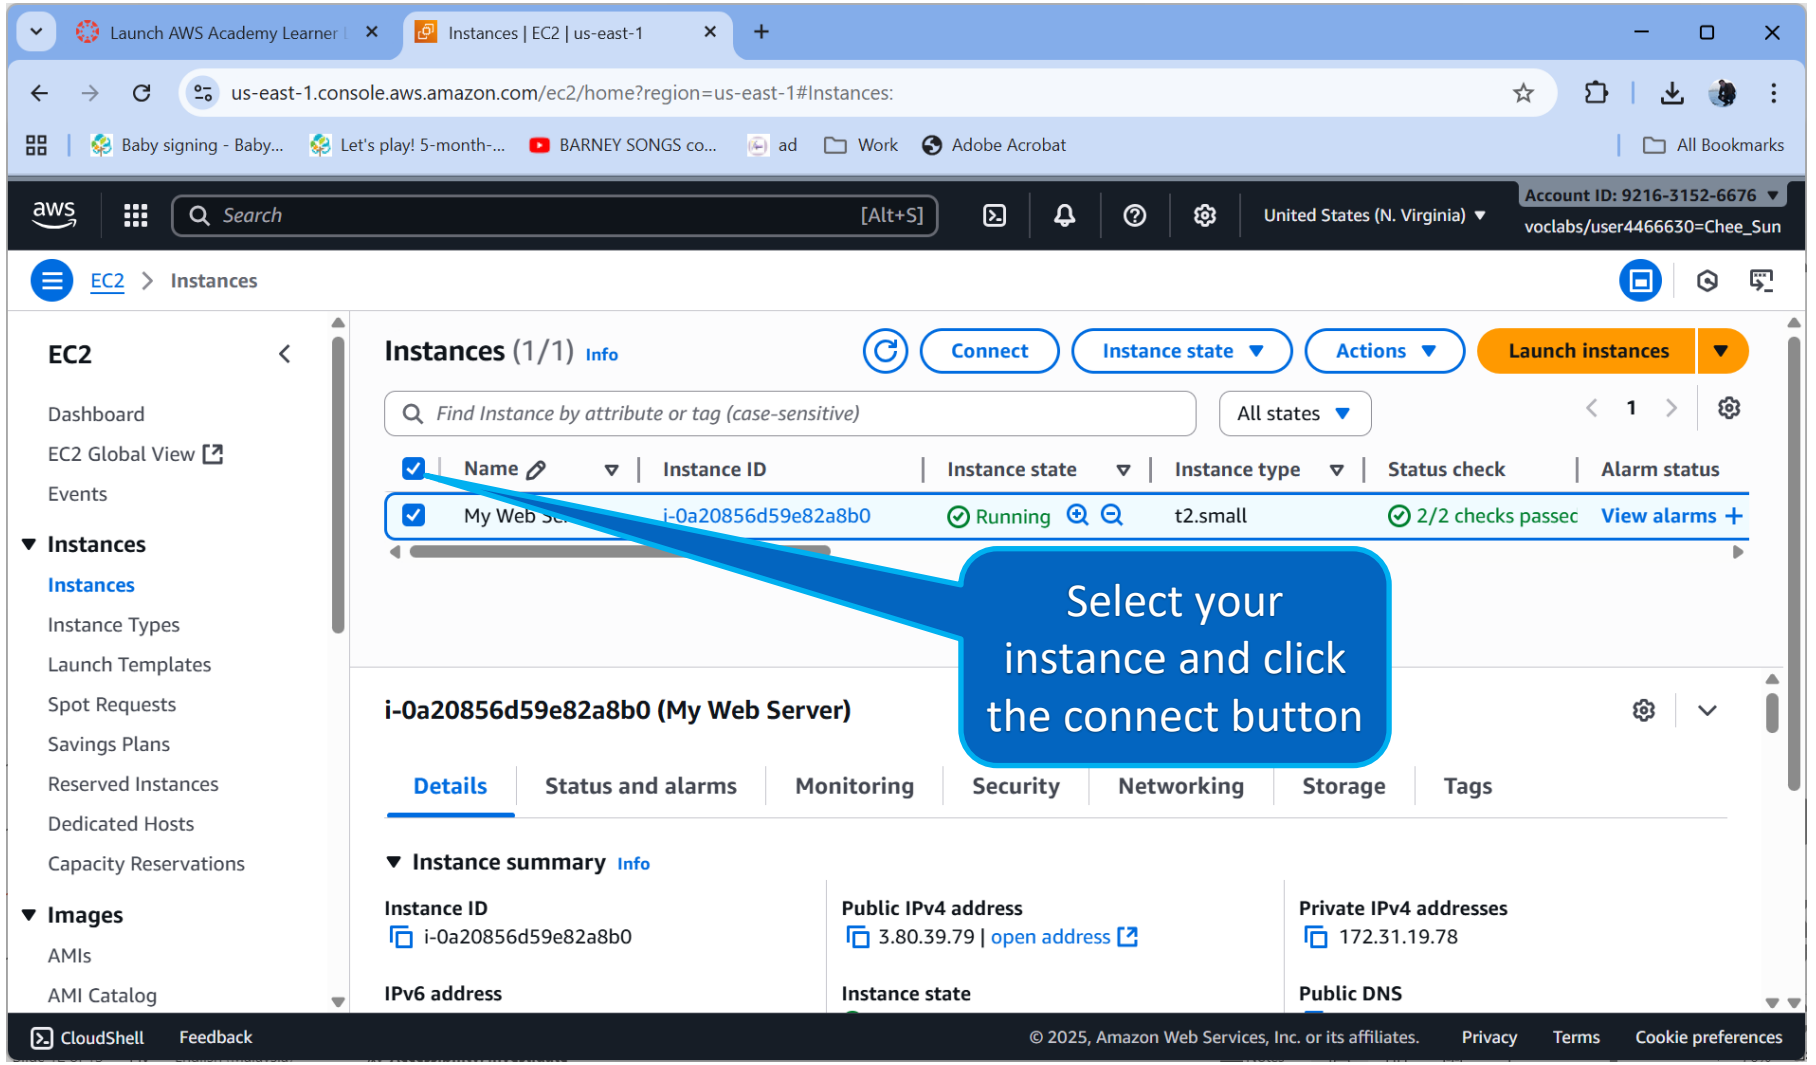

5.3 Instance has been created!

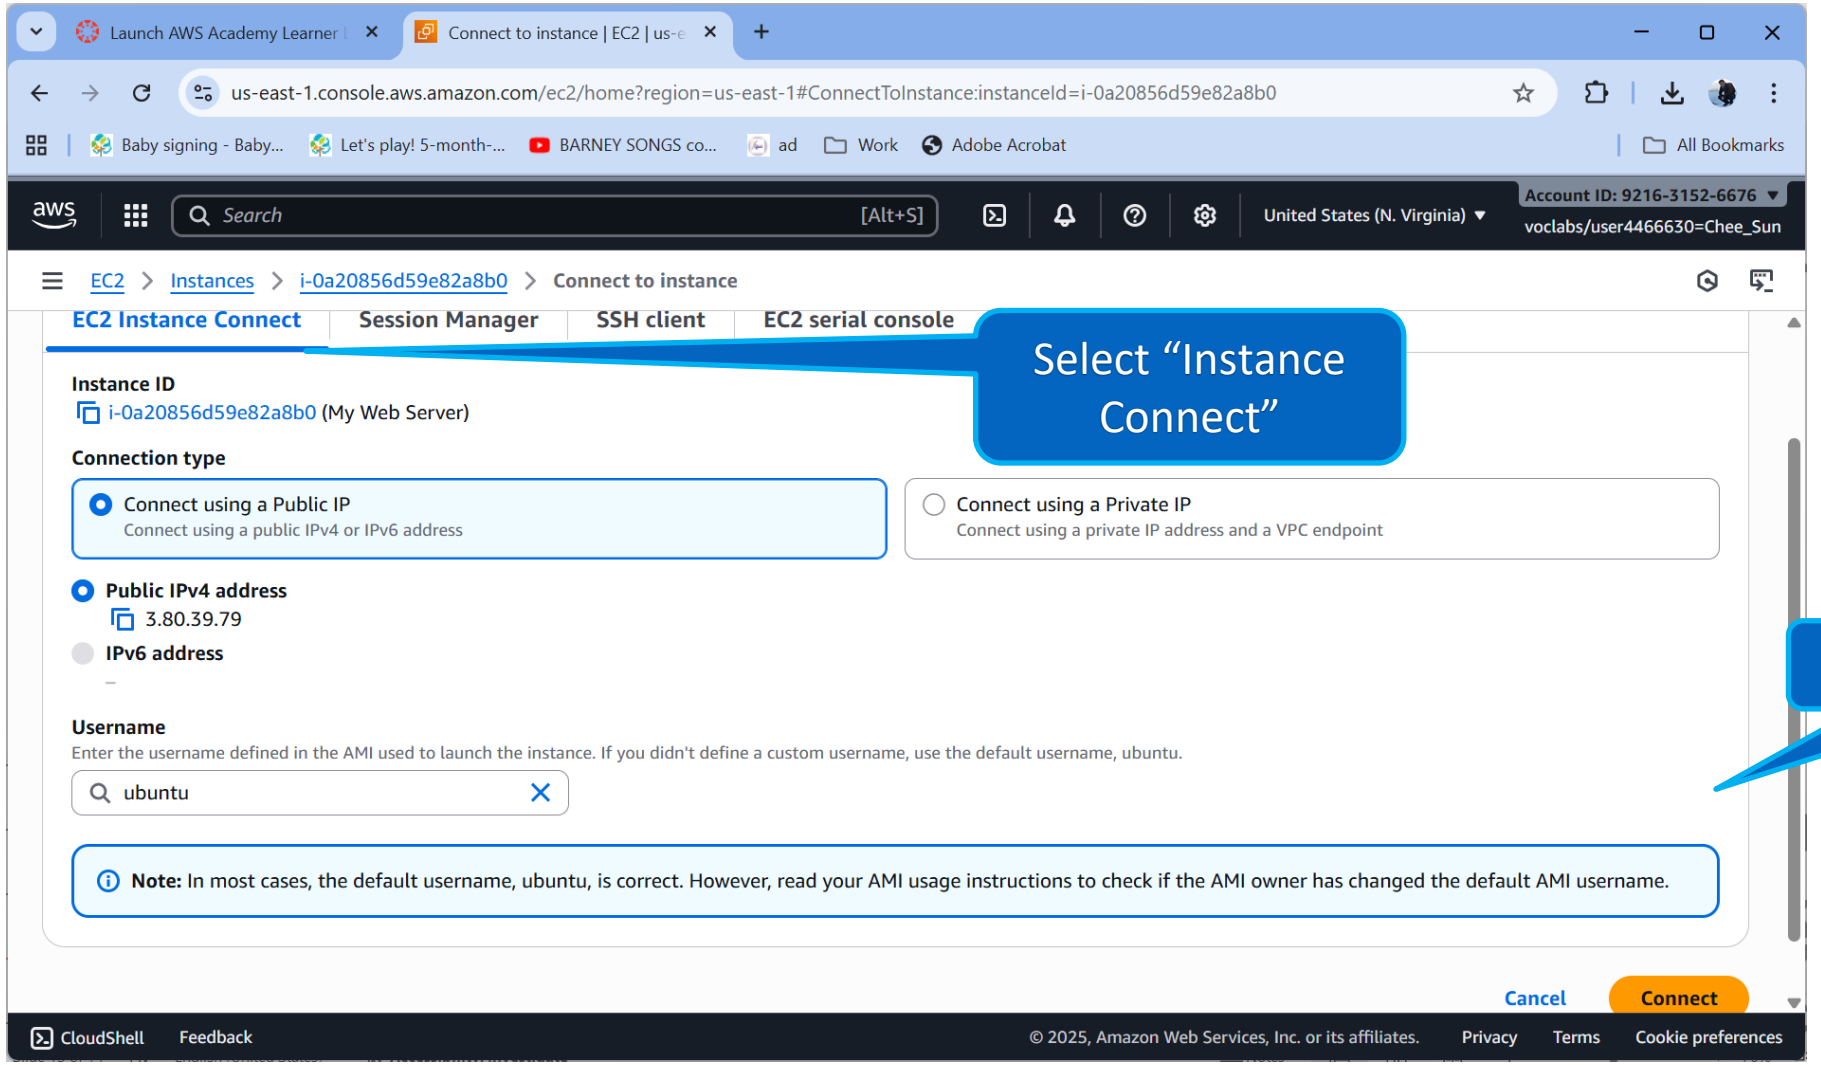

Remark for step 5

- It’s recommended to use the same security group for all your instances.
- Create one key-pair, and use it for all of our instances
- You can use the key with putty client later to access your instance (however, ITS has blocked all SSH connection)

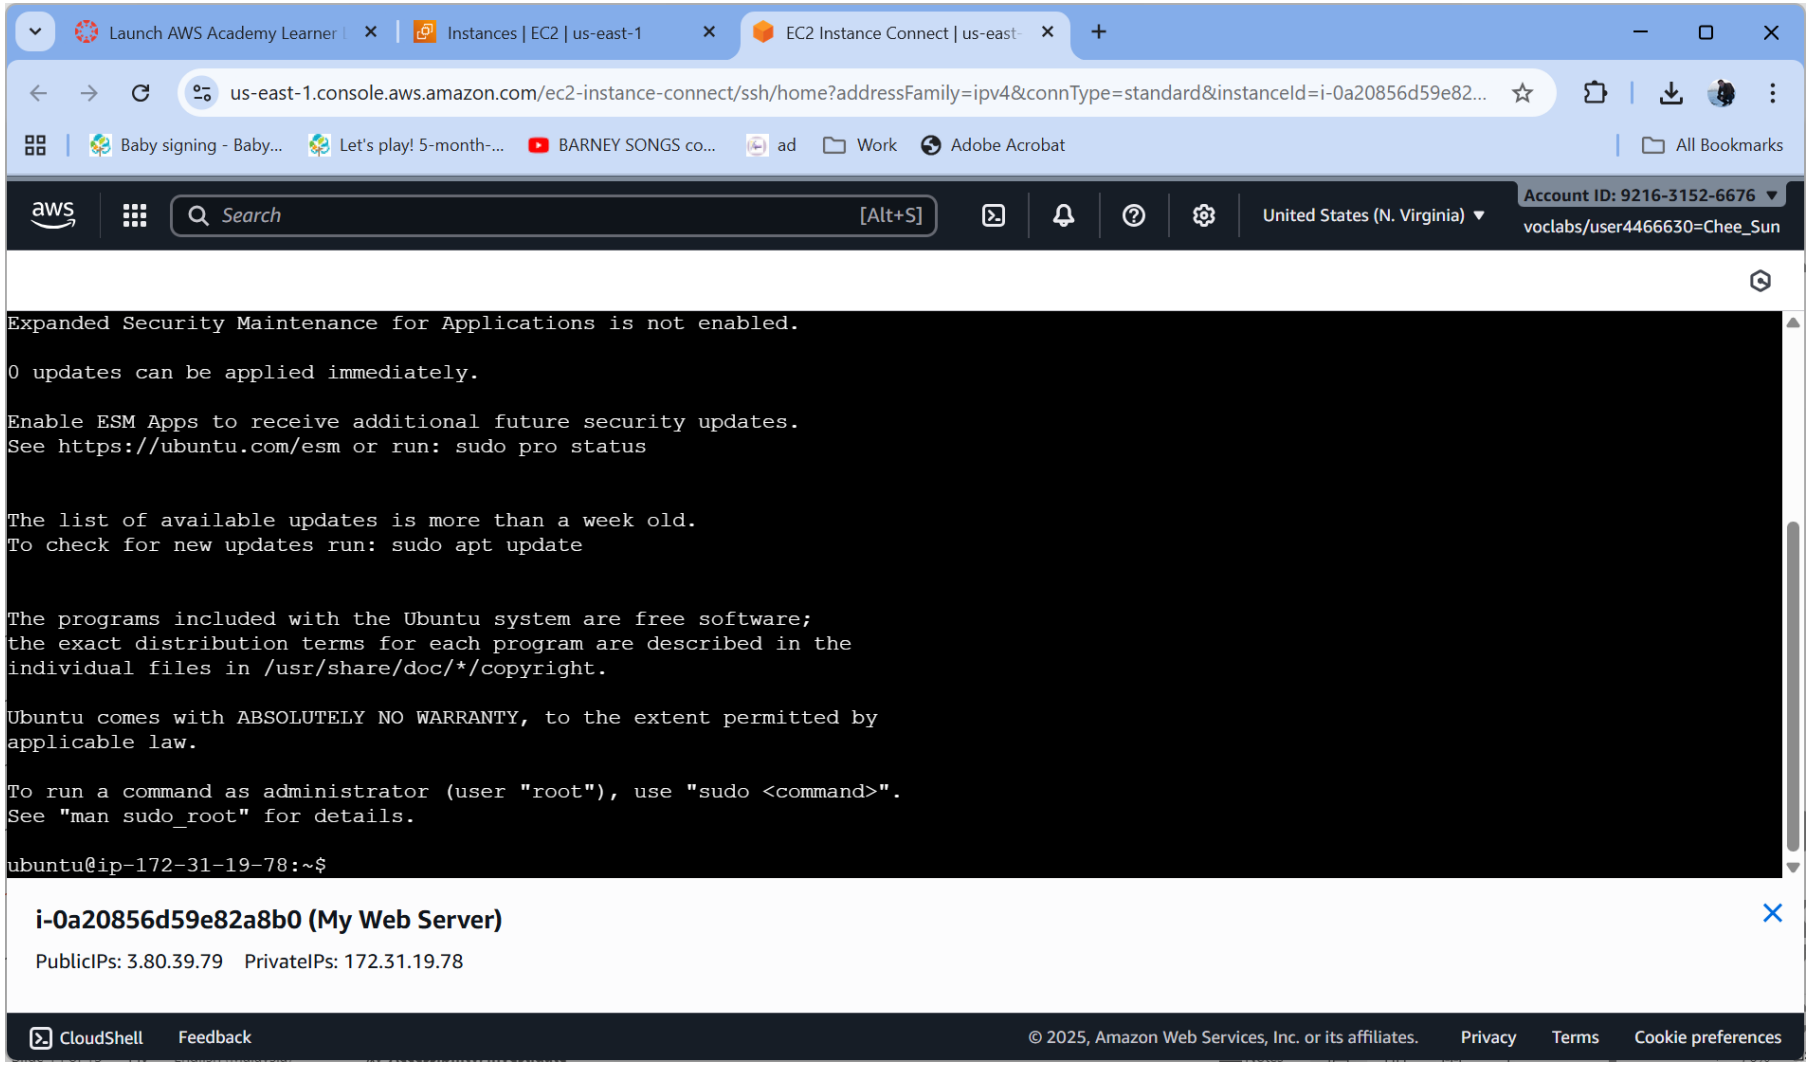

6. Connect to your instance

7. Connect to your first instance

Congratulation! *Instance created*

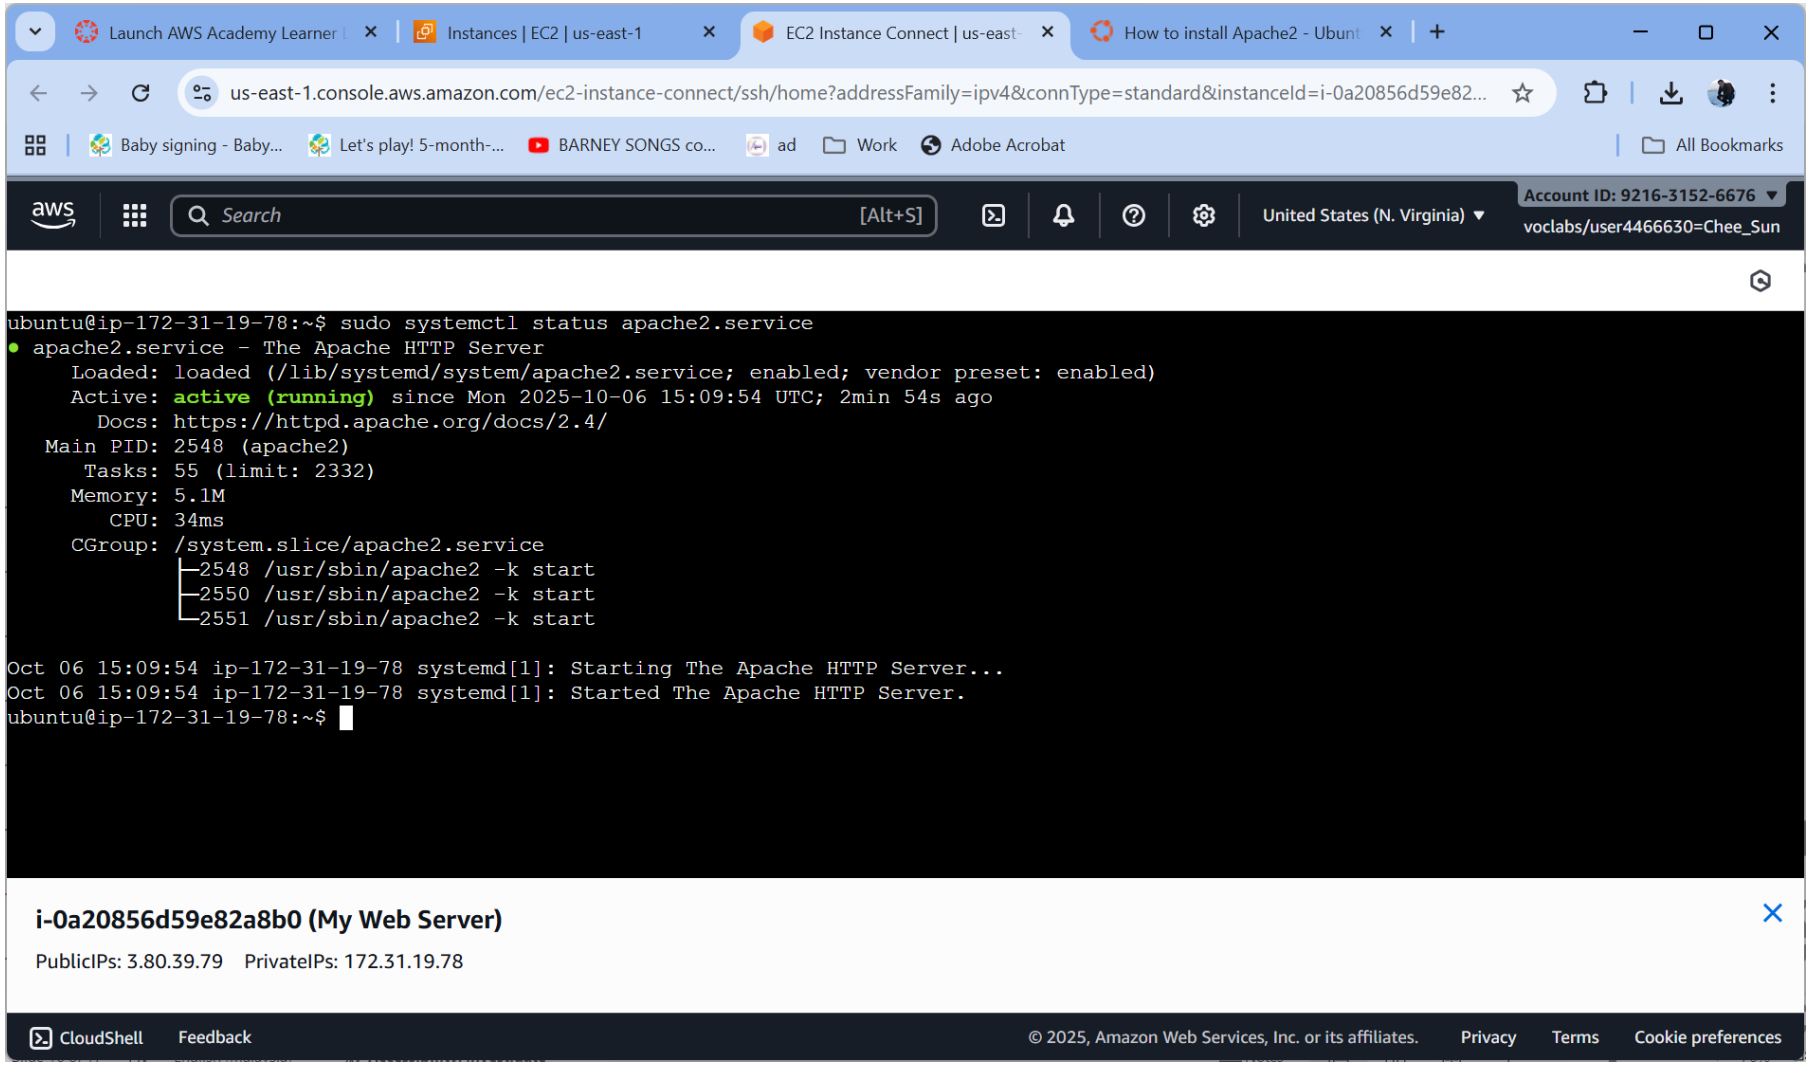

8. Install web server

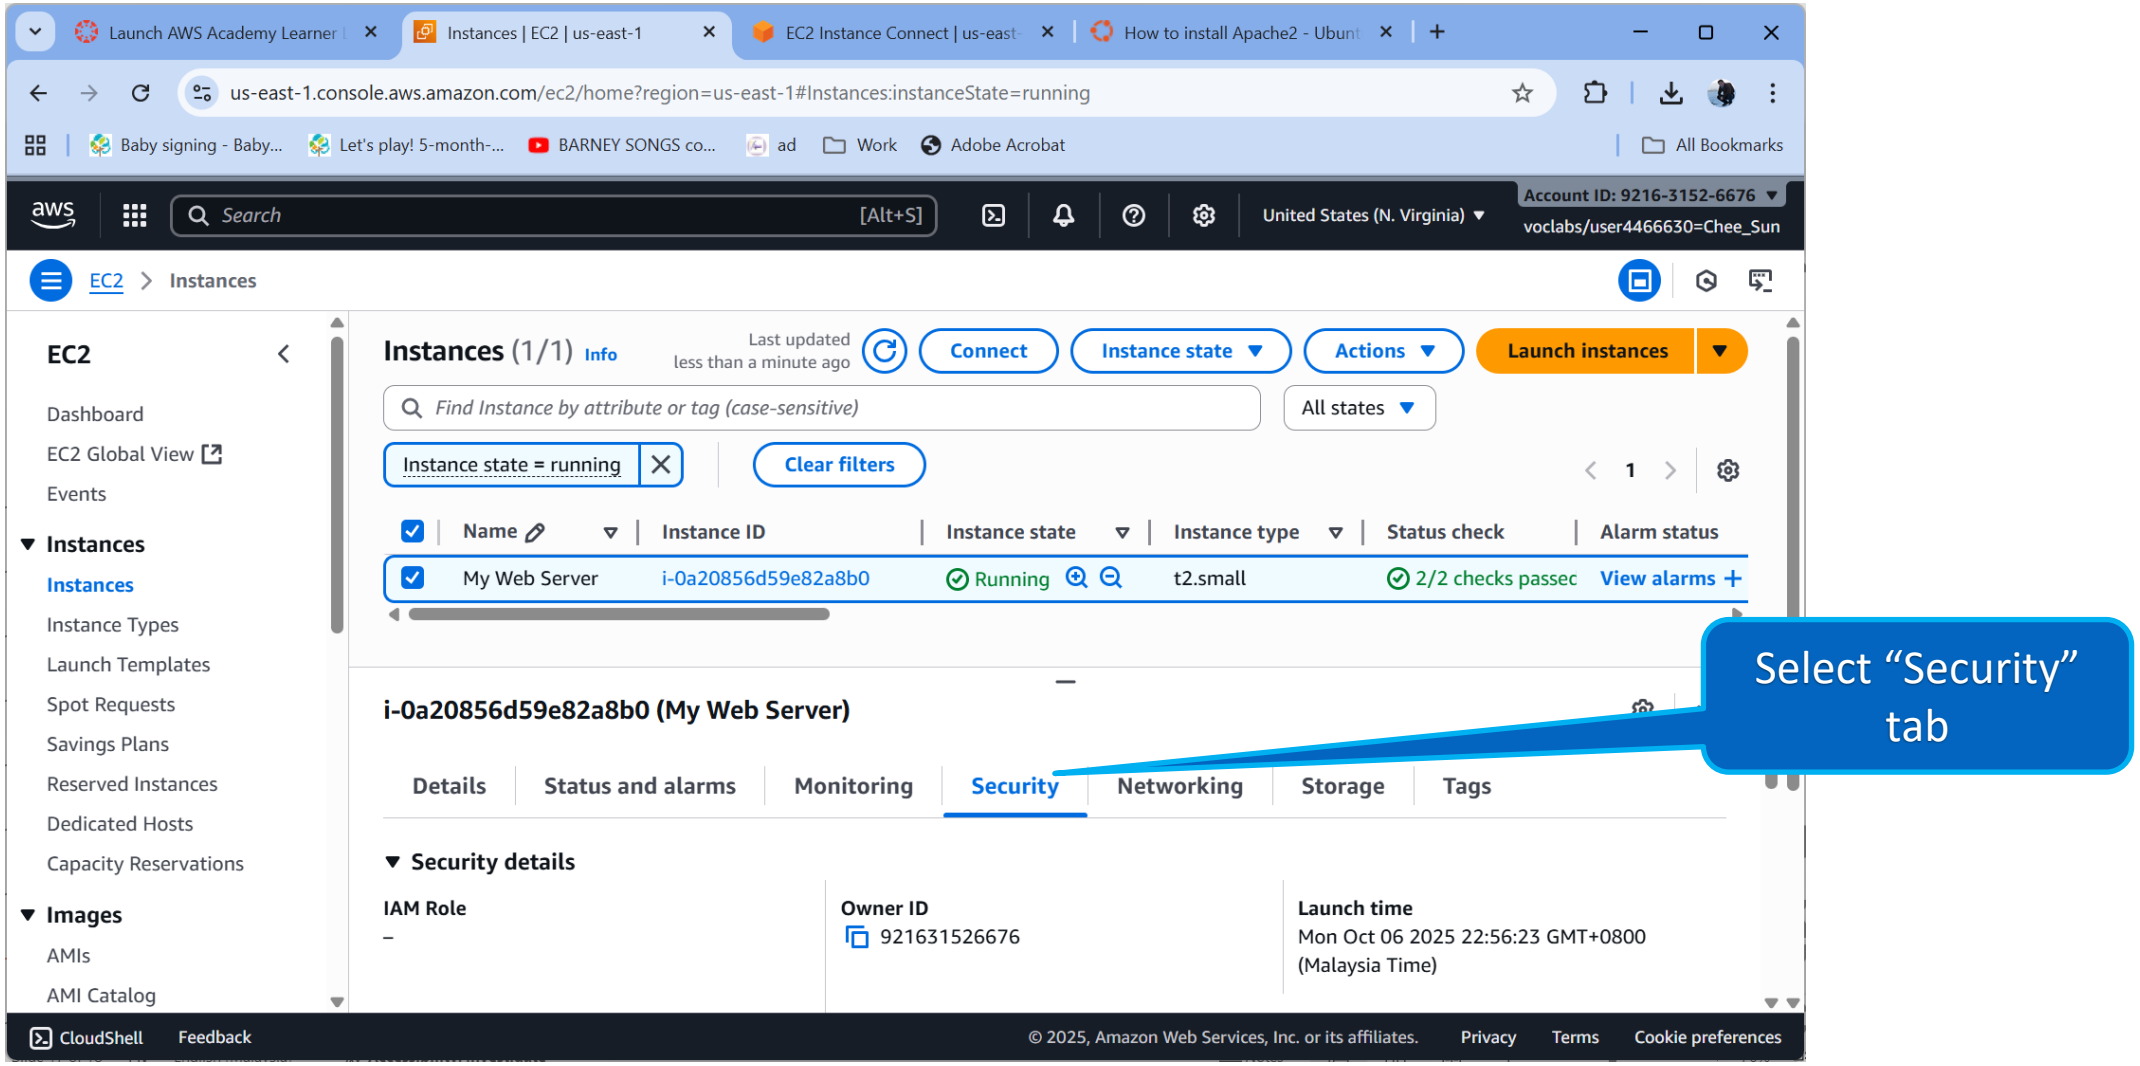

- *Follow the instructions at https://documentation.ubuntu.com/server/how-to/web-services/install-apache2/ to install the Apache2 web server*

- Update apt-get repo: **sudo apt update**
- Install apache2: **sudo apt install**
- Check status: **sudo systemctl status apache2.service**

Congratulation! Apache2 is active

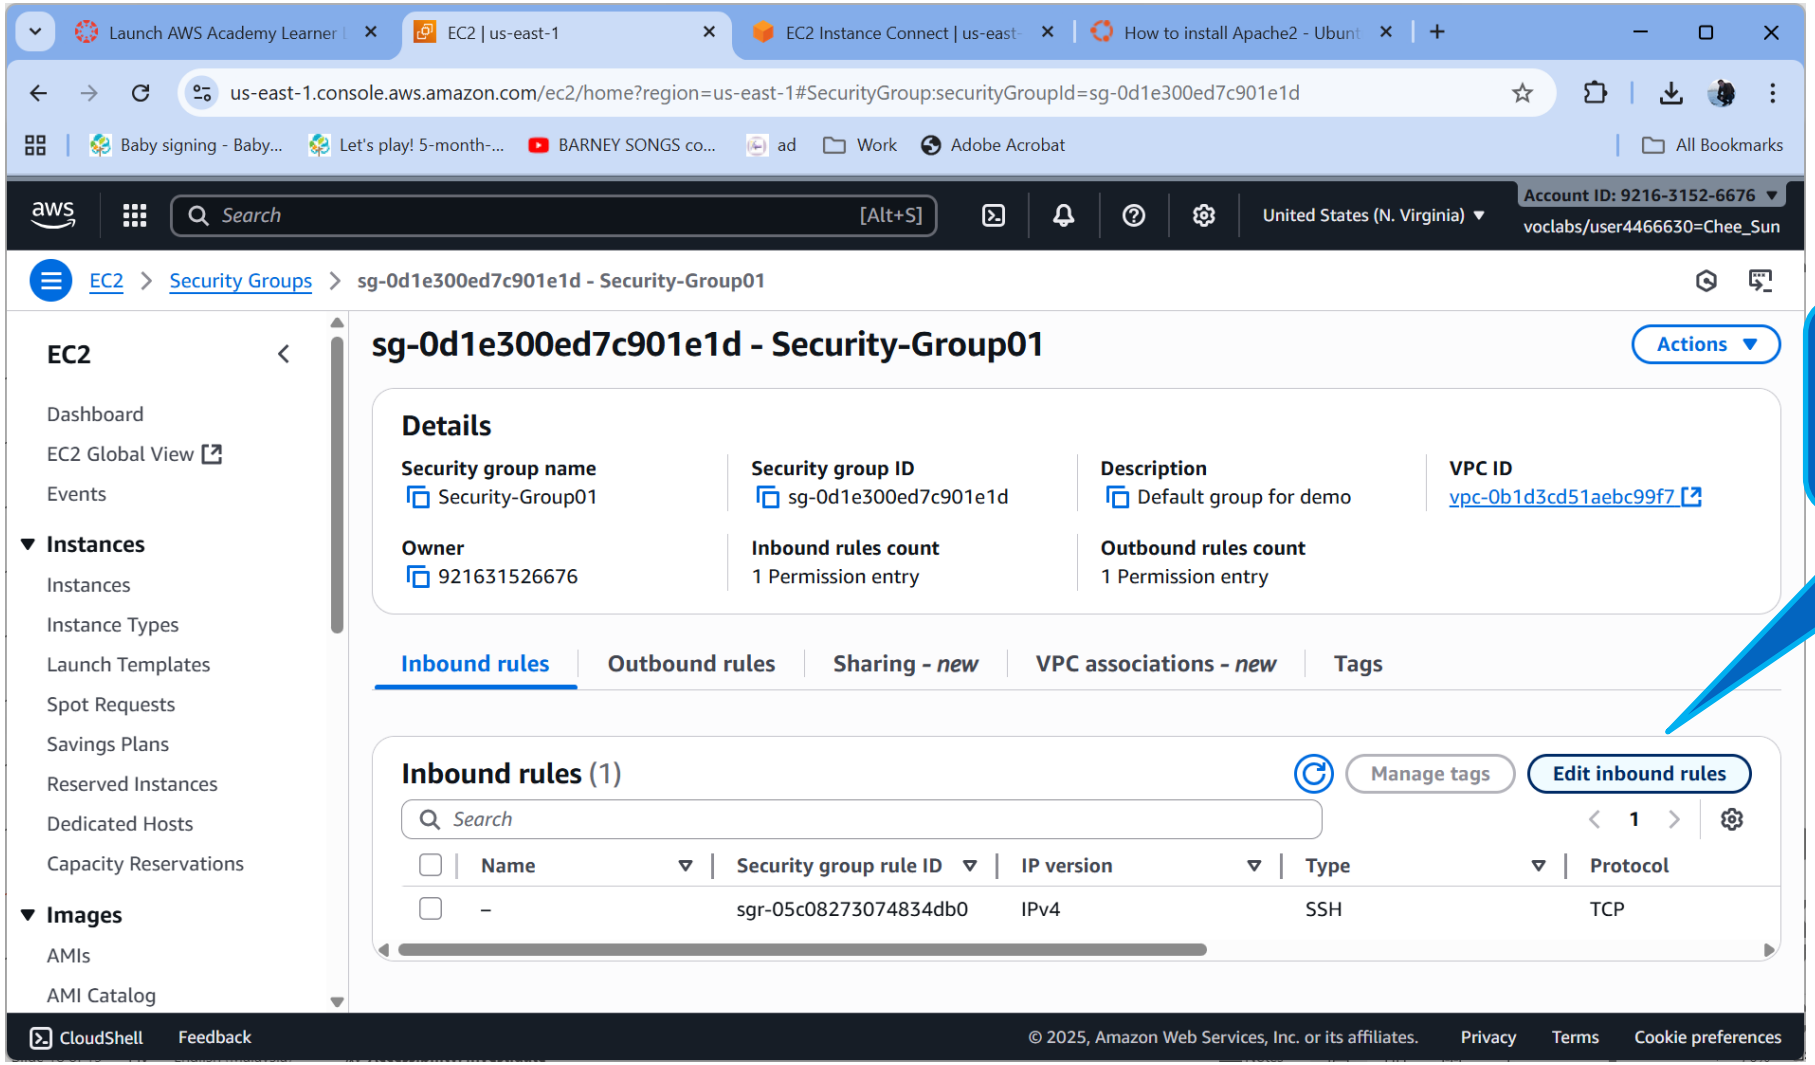

9. Edit security group

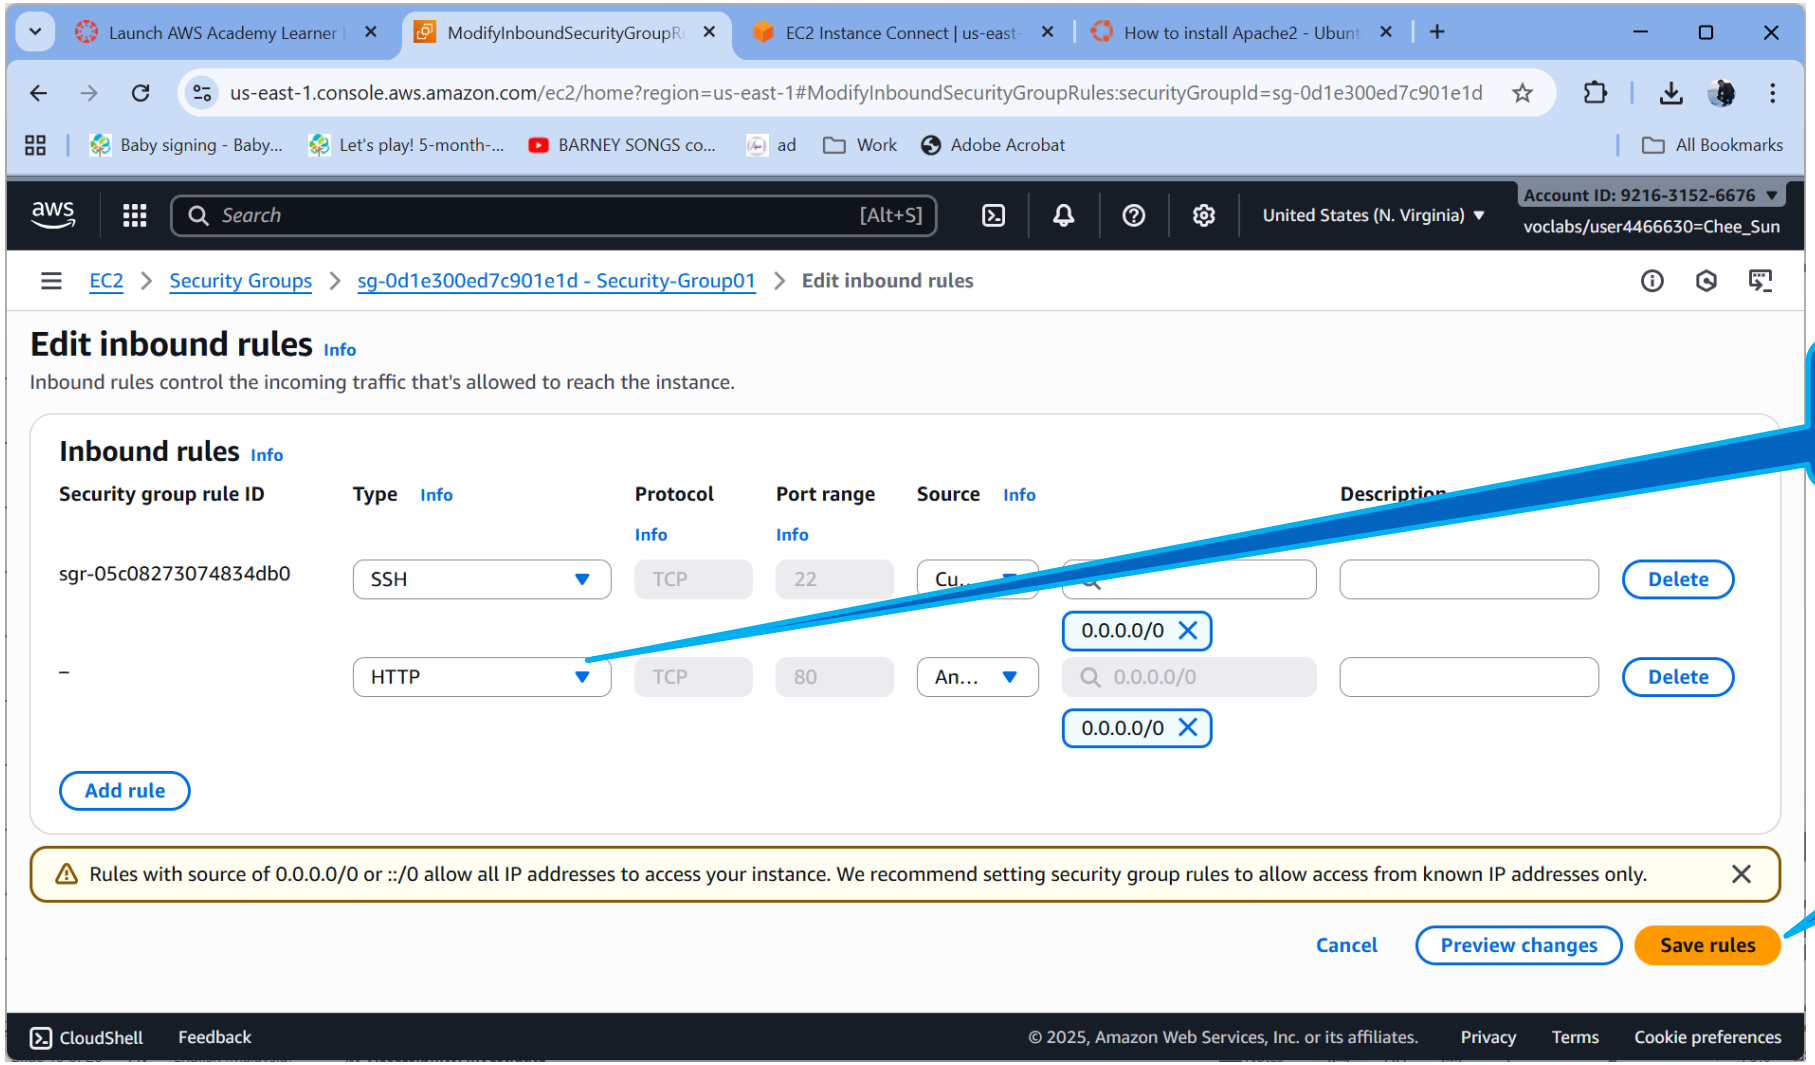

Select “Security” tab

9.1 edit the inbound rules

Click this button to change inbound rules

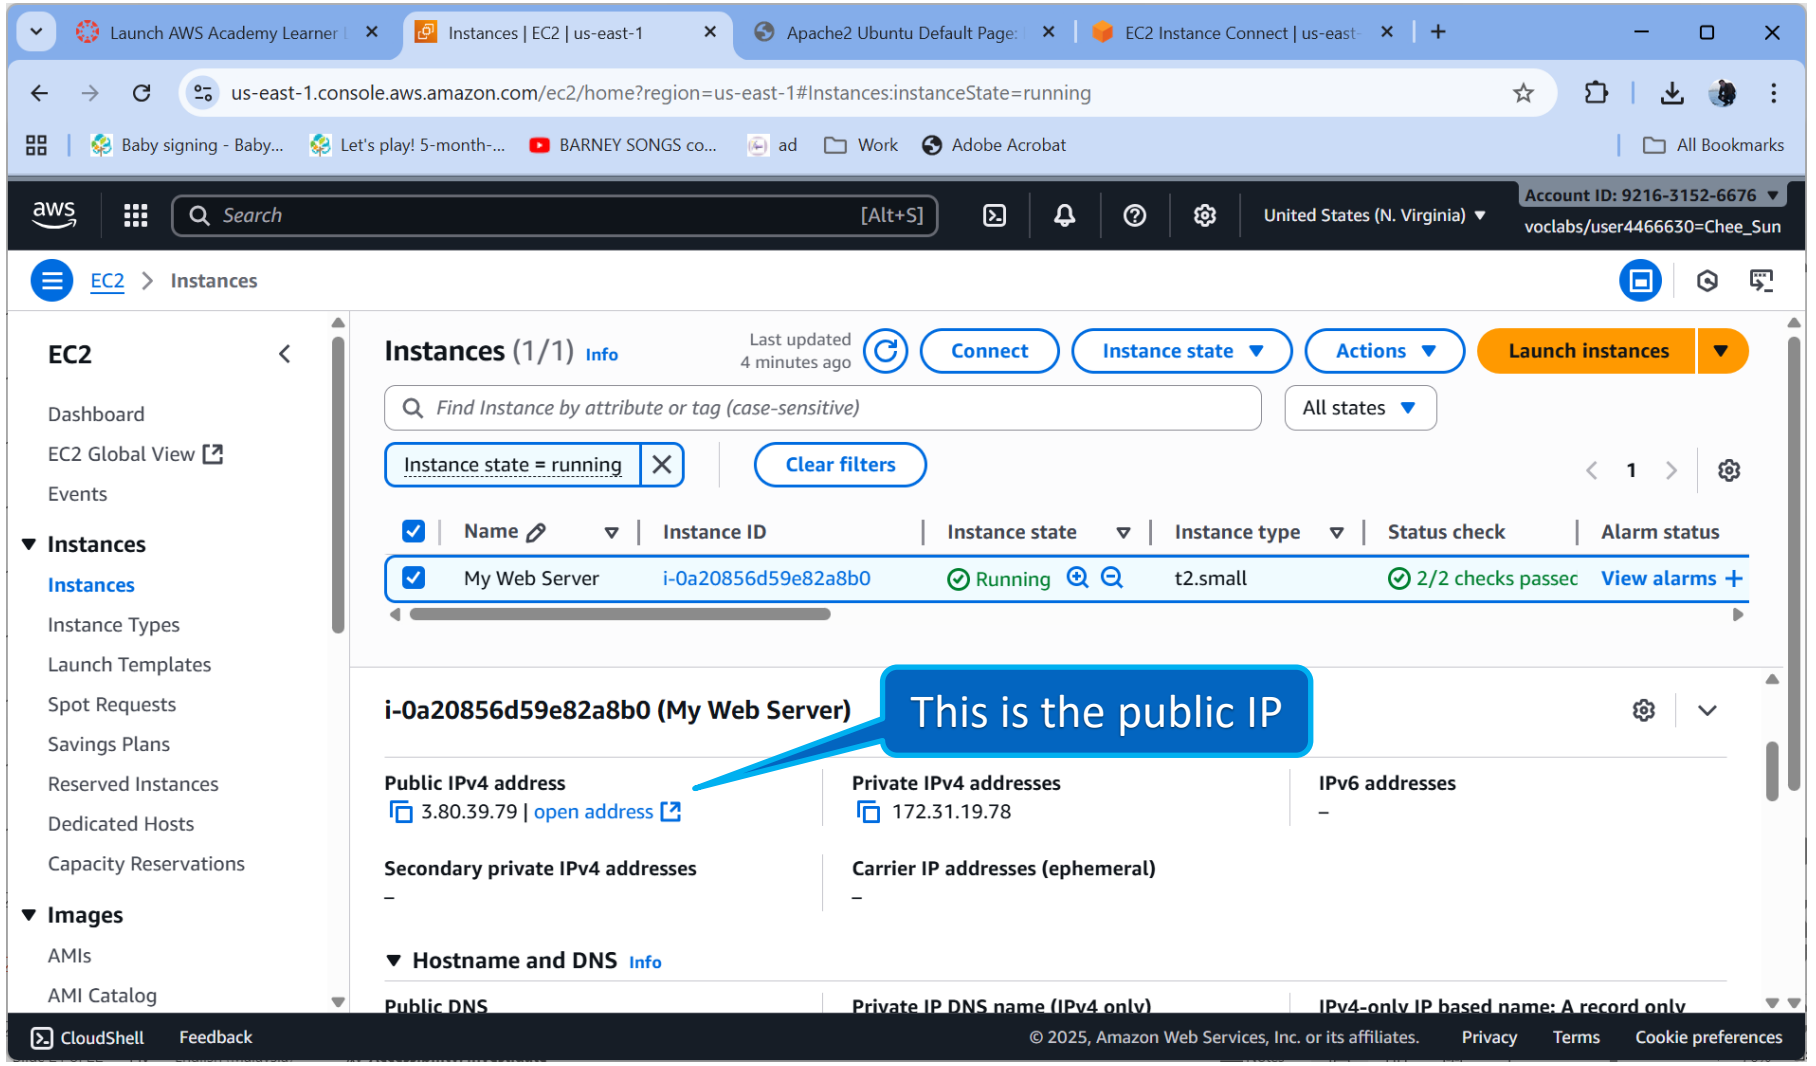

9.2 add HTTP to the inbound rule

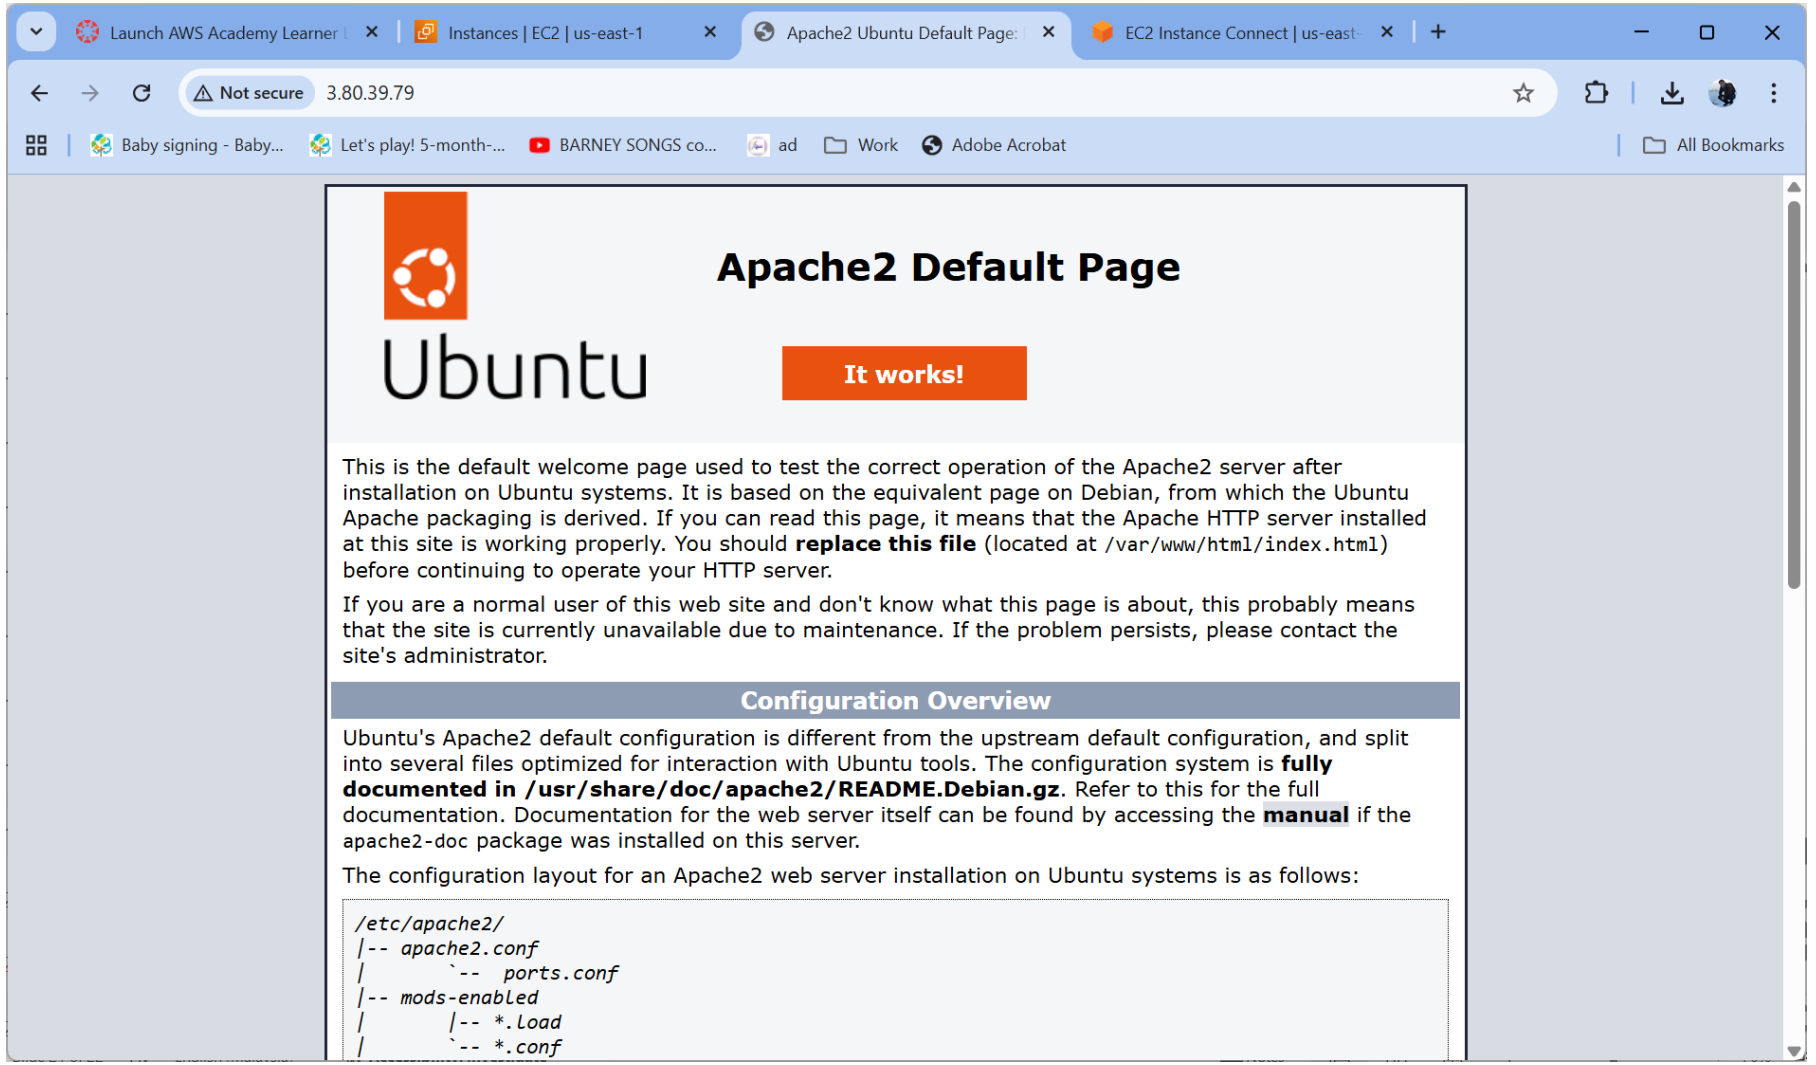

Add HTTP into the list

Click “Save rules” button

10. Find the public IP and view in browser

Congratulation! *Web page is ready*

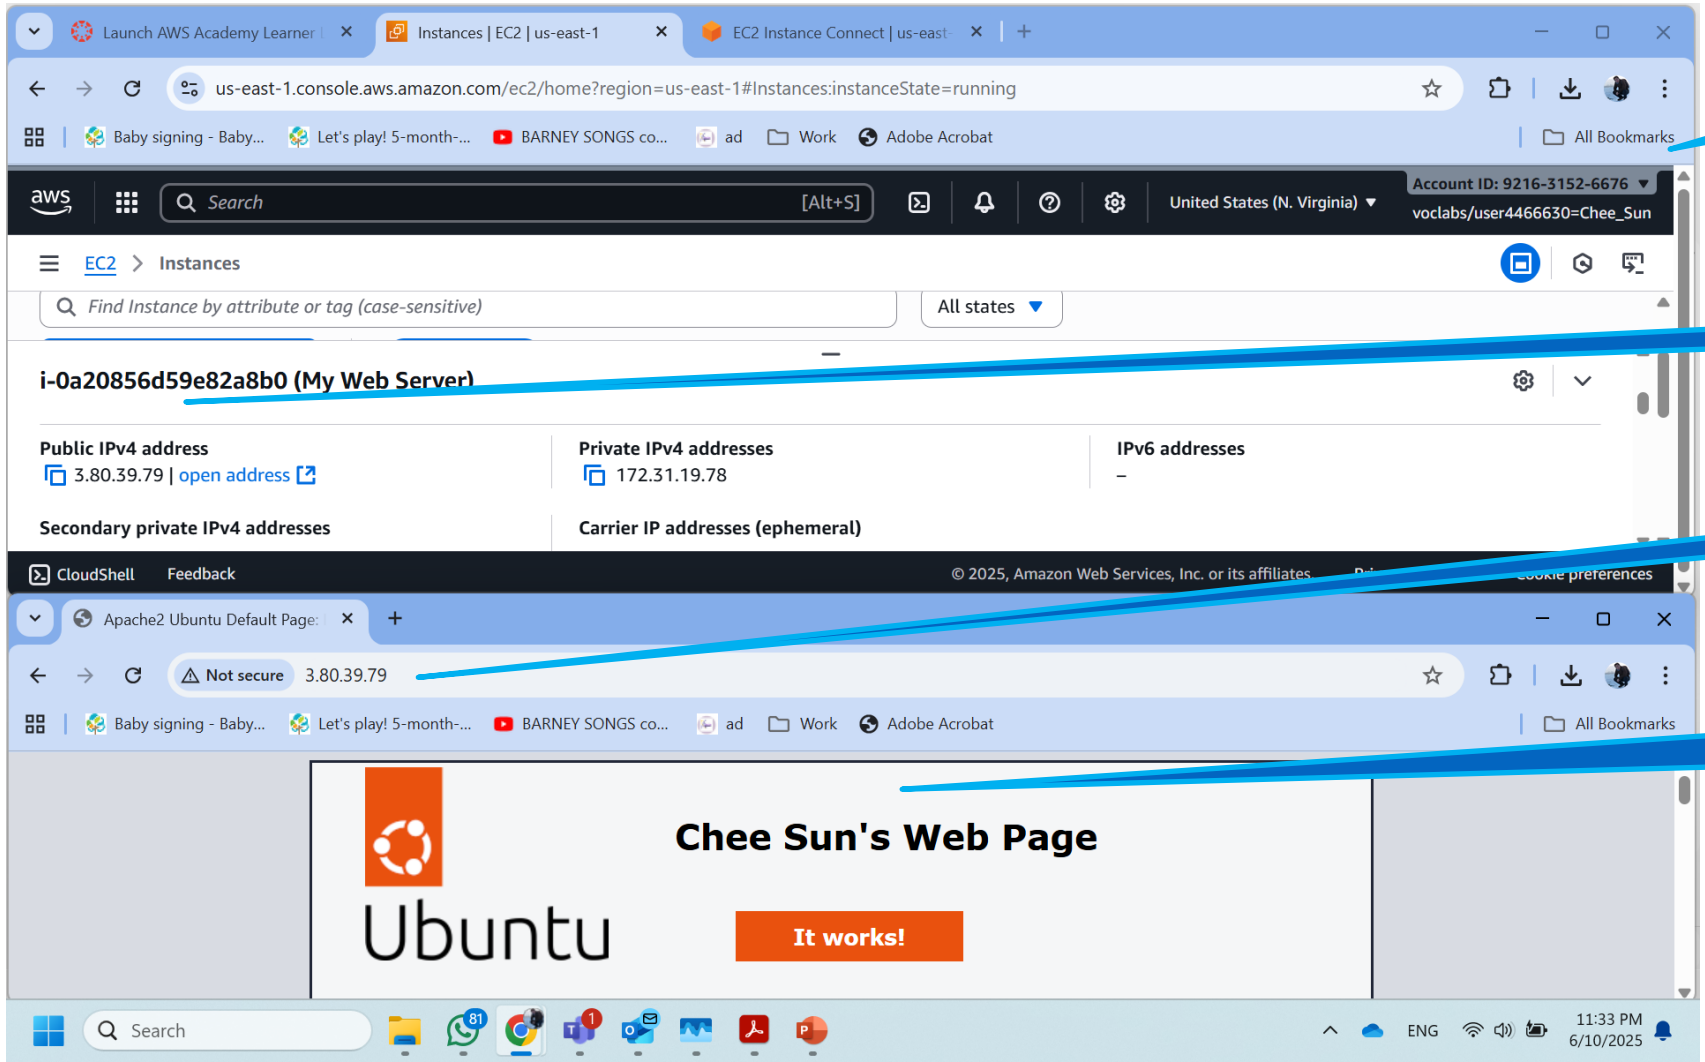

- **HTTP**
  and not
  HTTPS

11. Edit the default web page

- Go to the document root: **cd /var/www/html**
- Edit the page using nano: **sudo nano index.html**
- Replace the “Apache2 Default Page” with your name
- Print screen for submission

12. Submit your lab test 01 result

Your imail address

The public IP

The public IP

The modified content

THANK YOU
